This exploded perspective view shows the assembly of a multi-chambered device. The main body (9) consists of three stacked chambers, each with a central cylindrical component (26) and a side port (20). The top chamber is secured by a cap (1) with a handle (36B) and a locking mechanism (34). The bottom chamber is secured by a base (10) with a locking mechanism (34). The device is connected to a power source (66) via a cable (67) and a connector (68). A control unit (61) with a display (62) is connected to the device. A sensor or probe (47) is connected to the top chamber. The device is labeled PD100-332.
