

The logo for REOTEMP features the word "REOTEMP" in a bold, sans-serif font. The letters "REO" are in a dark blue color, while "TEMP" is in a lighter blue. A stylized, curved line in a light blue color sweeps under the text from left to right, starting below the "R" and ending below the "P". A registered trademark symbol (®) is located at the top right of the "P".

Your Reotemp Gauge Selection

PT45PIASP30

- Process Gauge
- 4.5" Phenolic Case with Solid Front, Blowout Back
- 316 Stainless Steel Tube and Socket
- 1/4" Hi-Pressure Rem Bottom Connection
- Single Scale: 0-1,500 psi
- 0.5% Accuracy Full Scale (Grade 2A)

DATA SHEETS

REOTEMP

Series PT45

4.5" INDUSTRIAL PROCESS GAUGE

REOTEMP's Series PT45 process gauge is designed to withstand corrosive atmosphere and media, pulsation and vibration, a very rugged gauge engineered for the process industries. The solid front and blowout back provides a high degree of user safety. Note: For highly-corrosive, high-temperature, or severe service applications a diaphragm seal is recommended.

FEATURES / BENEFITS

- Safety Pattern Design
- Solid Front/Blowout Back Safety Case
- All Stainless Steel Internal Parts
- Internal Overload and Underload Stops
- Fixed Plate Case
- Micro-Adjustable Pointer with Floating Zero

SPECIFICATIONS

Construction Materials:
New Model Case: Reinforced Thermoplastic (Phenolic) or 316SS
Stop Phenolic: 304/316 or 316/316SS
Welds: 316/316SS
Tube: 316/316SS (Standard), Socket: 316SS
Case-to-Socket: G-Thread
Lens: Tempered Safety Glass, Plastic, or Laminated Safety Glass
Temperature: Limited

"The configurator is awesome! Never worked with something so easy and user friendly and able to send pdf's of the quote. I like this!"

REOTEMP Distributor, Southeastern U.S.

"Love the Configurator, so easy to use and quick!"

REOTEMP Distributor, Southern U.S.

REOTEMP is a globally recognized ISO 9001 manufacturer of temperature and pressure instrumentation. REOTEMP sells through a mature distribution network that reaches all 50 states and 30 countries worldwide. We provide bimetal thermometers, pressure gauges, diaphragm seals, RTDs, thermocouples, pressure transmitters, compost thermometers, and related accessories to a variety of process markets worldwide.

Our reputation is built on high quality products, quick standard lead times, and exceptional customer support. We are dedicated to providing our customers with complete satisfaction, from the first phone call to the design and quality of the instrument they receive. REOTEMP provides both standard and application specific products and is ready and willing to find a solution to all of your temperature and pressure needs.

PRESSURE GAUGES

REOTEMP Pressure Gauges, manufactured under ISO 9001 quality standards, are offered in a wide variety of sizes, ranges, and configurations to meet the demands of any application. From the most rugged process gauges to the cost effective general purpose gauge, you can count on REOTEMP pressure gauges for long and reliable service.

All pressure gauge components should be selected after consideration of the pressure, temperature, media characteristics, and environmental factors. Misapplication or improper installation can cause gauge failure, which can result in damage to other equipment or personal injury. We suggest that users of pressure gauges become familiar with ASME B40.100 which is available at www.asme.org.

To ensure safety, accuracy, and gauge life, good practice requires the consideration of the following factors when selecting a pressure gauge:

1. Pressure Range

REOTEMP gauges can measure pressures from full vacuum to 30,000 psi and gauge and differential pressures as low as 10 inches of water column. Generally, a range of twice the working pressure is recommended with a maximum working pressure not to exceed 75% of scale. If pulsation occurs or media temperature is elevated, then working pressure should be at or below 50% of scale.

Most bourdon tube and capsule gauges can see momentary spikes of 130% of scale without permanent damage to the gauge (see data sheets for specific max working pressure). Information on gauge burst pressure is available under the “Resources” tab at reotemp.com

2. Process Media

All pressure gauge wetted components should be selected to suit the characteristics of the fluid being measured. Consider the following process media characteristics:

Temperature – Specific temperature limits are stated on the gauge data sheets. For media temperatures beyond the gauge limits a diaphragm seal or cooling element should be considered. For steam service a pigtail siphon should be used.

Corrosion – All wetted materials of the pressure gauge are noted on the data sheet. If the process fluid is not compatible with those materials then another gauge should be selected or a diaphragm seal should be installed.

Clogging – The pressure gauge socket and bourdon tube have small orifices that will clog in the presence of solids or high viscosity fluids. A diaphragm seal is recommended for these applications.

Pulsation – A mechanical pressure gauge is uniquely susceptible to the damaging effects of pulsation in a process. Most REOTEMP pressure gauges have restrictor screws (throttle plugs) installed in order to dampen some pulsation. Snubbers can be used to further dampen some types of pulsation. A diaphragm seal with the PulsePlus™ feature is recommended for severe applications.

3. Environmental Factors

The case style, material, and design of the pressure gauge should be selected to suit the environment of the gauge installation. The environmental factors to consider include:

Vibration – Mechanical pressure gauge components are highly susceptible to vibration. Liquid filling of the case is recommended in most applications where vibration exists. In cases of severe vibration the gauge may need to be remotely mounted using flexible capillary tubing with or without a diaphragm seal.

Ambient Temperatures – Most REOTEMP pressure gauges are rated for normal ambient temperatures for outdoor installations in most parts of the globe (-40 to 140°F). If the gauge is liquid filled, care should be taken in selecting the

right fill fluid for the ambient conditions.

Moisture and Corrosion – The presence of moisture, wash-down chemicals, salt water, and other environmental factors should be considered when selecting case style and material. In high humidity environments, liquid filling the case will avoid condensation buildup on the inside of the lens.

4. Accuracy

REOTEMP pressure gauges are available in accuracies ranging from 0.25% (ASME Grade 3-A) to +/- 3/2/3% (ASME Grade B). As a general rule, 1% or better gauges are used in critical process and require more costly components and larger dial sizes. All REOTEMP pressure gauges are calibrated to the stated accuracy at the time of manufacture; further certification and logging of point data can be provided on NIST traceable reference equipment.

5. Connection Size and Mounting

Most REOTEMP gauges come standard with 1/4" or 1/2" Male NPT process connections. Many other connection types are available including BSP, coned high pressure fittings, SAE, tube stub, VCR, and more.

The following mounting methods are most common for pressure gauges:

-  **Bottom Mount** (stem mount)
-  **Rear Mount** (lower back or center back connection based on model)
-  **Wall Mount** (includes a back flange attached to the gauge)
-  **Panel Mount** (includes a front flange or u-clamp attached to the gauge)

6. Dial Selection

REOTEMP pressure gauges are available in dial sizes ranging from 1.5" to 6". Typically, space consideration, accuracy, and readability are the driving factors behind dial size selection. For pressure gauges being installed into low-light or difficult to read environments, a Hi-Vis™ dial is recommended. Color bands, dual scales, tag numbers, and custom text are other options when selecting a pressure gauge for a specific application.

HEAVY-DUTY REPAIRABLE STAINLESS GAUGE

REOTEMP's Series PR gauge offers rugged, all-welded stainless steel construction ideal for heavy-duty industrial applications. The stainless steel case, tube and socket are welded together for superior case sealing and gauge integrity. The twist-off bayonet ring offers easy access for field repair and calibration services. Liquid filling (at the factory or in the field) is recommended for applications involving vibration.

ALL-WELDED PROCESS SEAL GAUGE

REOTEMP's All-Welded Pressure Seal Gauge offers superior diaphragm seal safety and performance at an economical price. Combined with a gauge or transmitter, the tamper-resistant all-welded diaphragm seal reduces potential leak points, making it ideal for installations where process integrity and worker safety are paramount. Combined with PulsePlus™ protection, the Series MS8 can potentially triple the life of your gauge or transmitter.

All drawings depict a 1/2" NPT Male process connection.
See online configurator for specific assembly drawings.

DIAPHRAGM SEAL MAX WORKING PRESSURE (AT 100°F)

		316SS	Hast. C-276	Monel
Male	1/4" NPT	5,000 psi	2,000 psi	2,000 psi
	1/2" NPT	5,000 psi	2,000 psi	2,000 psi
	3/4" NPT	2,000 psi	n/a	n/a
	1" NPT	1,000 psi	n/a	n/a
Female	1/4" NPT	2,500 psi	n/a	n/a
	1/2" NPT	2,500 psi	n/a	n/a

Note: Maximum working pressure is lesser of proof pressure and 130% of gauge range.

FEATURES / BENEFITS

- Increases the Life of the Gauge by Up to 3x
- Reduce/Eliminate Fugitive Emissions
- Available Up to 5,000 psi
- Eliminate Potential Leak Points
- Tamper Resistant
- Compliant to NACE MR0175, MR0103

SPECIFICATIONS

Accuracy	With appropriate pressure range, seal gauge accuracy is gauge accuracy plus 0.5%. (May be subject to thermal error. Consult factory with questions.)
Ambient Limits	-40°F/150°F
Process Limits with Diaphragm Seal	-40°F/400°F (Direct Mount)* -110°F/750°F (Remote Mount or Cooling Tower)* *Exact limits depend on diaphragm seal and fill fluids.
Wetted Materials	Diaphragm, Lower and Process Connection: 316LSS or Hast. C-276 Gasket: None
Lens	Tempered Safety Glass, Plastic or Laminated Safety Glass
Other Materials	Upper Housing: 316SS
Fillable	Yes
Maximum Working Pressure	See table left.
Environmental Protection	NEMA 4X/IP65
Weight	0.6 lbs (Seal Only)

Diaphragm Seal Suitability Guide

For applications where a diaphragm seal is required, the following diaphragm seal model types are most commonly assembled and filled to Series PI45 pressure gauges. This matrix identifies which diaphragm seal is appropriate based on the specified pressure range. Please reference the diaphragm seal data sheet and seal fill fluid guide for additional application considerations including max pressure, temperature limits, and material compatibility.

Diaphragm Seal Model		Total Gauge Span* (in psi)						
		15	30	45	60	75	100	160+
Mini Seals		MS6	X	S	T	T	T	
		MS8	S	T	T			
Threaded Flush		1"	X	X	X	S	S	T
		1.5"	S	S	T	T		
Offline		W5	S	T	T			
		W6	T					
		T5	S	T				
		W7/V5						

*Total gauge span is additive of negative and positive pressures.

Example: -15 - 0 - 30 psi = 45 psi span

- Assembly will function correctly with minimal accuracy degradation.
- Assembly will function correctly given stable temperature.
- Assembly is highly sensitive to orientation and temperature variance. REOTEMP cannot guarantee a stated accuracy.
- Assembly will not work. The diaphragm does not displace enough fill fluid to drive the pressure gauge.

ALL STAINLESS STEEL LOW PRESSURE GAUGE

REOTEMP's Series PC low pressure gauges offer accurate and reliable measurements of gaseous media. Offered with stainless steel internals, the Series PC is designed to withstand corrosive media and ensure a long-lasting instrument.

Diaphragm Seal Suitability Guide

For applications where a diaphragm seal is required, the following diaphragm seal model types are most commonly assembled and filled to Series PR25/35 pressure gauges. This matrix identifies which diaphragm seal is appropriate based on the specified pressure range. Please reference the diaphragm seal data sheet and seal fill fluid guide for additional application considerations including max pressure, temperature limits, and material compatibility.

Available Units:
 ■ psi (std) ■ bar
 ■ kPa ■ kg/cm²
 ■ ft H₂O ■ & more

For Additional Range Codes See Page 45

See Pages 50 & 83 for Additional Options

Total Gauge Span* (in psi)

	Tri-Clamp	15	30	45	60	75	100	160	200 +
SG20	3/4"	X	S	S	T	T			
	1.5"	T							
	2"								
SG25	3/4"	X	S	S	T	T	T	T	
	1.5"	T	T						
	2"

	1.5"	X	X	X	T	T	T		
	2"	S	T	T					
	2.5"	T							

*Total gauge span is additive of negative and positive pressures.

Example: -15 - 0 - 30 psi = 45 psi span

- Assembly will function correctly with minimal accuracy degradation.
- T Assembly will function correctly given stable temperature.
- S Assembly is highly sensitive to orientation and temperature variance. REOTEMP cannot guarantee a stated accuracy.
- X Assembly will not work. The diaphragm does not displace enough fill fluid to drive the pressure gauge.

INDUSTRIAL STAINLESS STEEL GAUGE

REOTEMP's Series PM feature a stainless steel case, tube and socket, making the gauges resistant to corrosion from both environment and media. Liquid filling is recommended for severe service. The economical and attractive crimp ring design, along with a variety of convenient panel mounting adapters, make this popular gauge the right choice for many applications.

INDUSTRIAL STAINLESS STEEL GAUGE

REOTEMP's Series PM feature a stainless steel case, tube and socket, making the gauges resistant to corrosion from both environment and media. Liquid filling is recommended for severe service. The economical and attractive crimp ring design, along with a variety of convenient panel mounting adapters, make this popular gauge the right choice for many applications.

Fillable

Custom Logo

FEATURES / BENEFITS

- Economical Gauge with Stainless Steel Case and Internals
- Case is Easy to Fill in the Field
- Ideal for Both Indoor and Outdoor Applications

SPECIFICATIONS

Accuracy	2 - 1.6 - 2%, ASME Grade B+
Ambient Limits	-40°F/150°F
Process Limits	-40°F/150°F
Process Limits with Diaphragm Seal	Not recommended for diaphragm seal mounting, see PR model gauges for diaphragm seal mounting.
Wetted Materials	Tube: 316SS Socket: 316SS
Lens	Plastic (Standard) or Glass
Other Materials	Case: 304SS Ring: 304SS Dial: White Aluminum, Black Letters Case-to-Socket: Screw Connection
Fillable	Yes
Restrictor Screw	Built-in, Non-Removable
Maximum Working Pressure	Stable = 100% Momentary = 110% of scale
Environmental Protection	NEMA 4X/IP65
Weight	2.5" = 0.3 lbs (0.45 lbs filled) 4" = 0.8 lbs (1.4 lbs filled)

INDUSTRIAL TEST GAUGE

REOTEMP's Series PL test gauge is designed for use in laboratories, testing or calibration facilities, or wherever accuracy and repeatability are of prime importance. Rugged, all-welded stainless steel construction makes this gauge suitable for almost any test application. Reading error due to parallax is eliminated by use of a knife-edge pointer and mirror dial.

PL60

DIAPHRAGM TYPE DIFFERENTIAL GAUGE

REOTEMP Series D40/D42 differential pressure gauges are ideally suited for use on dissimilar fluids, wet gas or fluids with a high concentration of solids. Other applications include: use in Filter/Strainer Monitoring, Compressed Air, Hydraulic, Refrigerant, Pump Performance Testing, Heat Exchanger Pressure Drop Monitoring, Water Treatment Applications, Tank Level Monitoring Horizontal or Vertical, and Flow Monitoring & Balancing.

D40

Fillable

Diaphragm Seal
Compatible

FEATURES / BENEFITS

- Total Separation of High and Low by a Convuluted Elastomer Diaphragm
- Liquid Fillable Case Available
- For Use with Diaphragm Seals†
- Weatherproof Rated to NEMA 4X/IP65
- Working Pressure Up to 3,000 psi

SPECIFICATIONS

Accuracy	± 3 - 2 - 3%
Ambient Limits	-40°F/130°F
Process Limits	-40°F/200°F
Process Limits with Diaphragm Seal	-60°F/350°F (Direct Mount)* -110°F/750°F (Remote Mount or Cooling Tower)* *Exact limits depend on diaphragm seal and fill fluids.
Wetted Materials	Body: Aluminum, Brass, Monel, Aluminum-bronze, 316SS Internal Parts: 316SS, Monel Gaskets/Seals: Buna, Viton, Silicone, or Ethylene Propylene
Lens	Plastic (Standard) or Laminated Safety Glass
Other Materials	Case: Aluminum or Engineered Plastic, Dial: White Aluminum, Black Letters
Fillable	Yes, 4.5" Aluminum Case Only
Maximum Working Pressure	3,000 psi (6,000 proof) Aluminum or SS Body, 1,500 psi (3,000 proof) Brass Body
Environmental Protection	NEMA 4X/IP65

†Diaphragm seals protect the gauge against corrosion, heat, and clogging from certain process fluids. Diaphragm seals will reduce accuracy.

Diaphragm Seal Suitability Guide

Differential Pressure Gauges are very sensitive and require diaphragm seals with high fluid displacement. If a diaphragm seal is required to isolate the process fluid from the pressure gauge, the following seal model types are available for the Series D40/42.

-PD5	-M1
PRESSURE RANGE	OPTIONS
-PD5 = 0-5 psid -PD10 = 0-10 psid -PD20 = 0-20 psid -PD100 = 0-100 psid -ID25 = 0-25 inH ₂ O _d -ID100 = 0-100 inH ₂ O _d	-M1 = 2" Pipe Mounting Kit with Carbon Steel Bracket -M2 = 2" Pipe Mounting Kit with Stainless Steel Bracket -M3 = Wall Mounting Kit -SG = Laminated Safety Glass (4A Dial ONLY) -MP = Max Pointer (Not Available with SG or LF) -LF = Liquid fill (only with 4A dial, std. lens) -TS = SS tag -OX = Cleaned for oxygen service -C3 = 3pt. Calibration Cert.

For Additional Range Codes See Page 46

Diaphragm Seal Model

Total Gauge Span

		<99"H ₂ O	100"H ₂ O	150"H ₂ O	10psi	15psi	20psi+
High Displacement	W7	X	S	S	T		
	T6	X	X	X	T		
	V5	X	S	T			

	Assembly will function correctly with minimal accuracy degradation.
T	Assembly will function correctly given stable temperature.
S	Assembly is highly sensitive to orientation and temperature variance. REOTEMP cannot guarantee a stated accuracy.
X	Assembly will not work. The diaphragm does not displace enough fill fluid to drive the pressure gauge.

Visit reotemp.com/configurators for easy seal configuration.

PISTON TYPE MECHANICAL DIFFERENTIAL PRESSURE GAUGE

REOTEMP Series D20 Piston Type Mechanical Differential Pressure Gauges are primarily designed for liquid applications. Differential pressure is sensed by the movement of a precisely ground floating piston/magnet in a precision bore against a calibrated spring. A rotary pointer magnet located close to the internal magnet follows the movement of the piston magnet and indicates differential pressure on the dial. Piston type differential pressure gauges exhibit a slight amount of bypass as the fluid crosses from the high to the low pressure port.

D20

Fillable

FEATURES / BENEFITS

- Rugged, Compact, Cost Effective Design
- Weatherproof Rated to NEMA 4X/IP65
- Working Pressure Up to 6,000 psi
- Over-range Protection to Max Working Pressure
- Popular for Filters and Strainers
- $\pm 2\%$ Full Scale Accuracy

SPECIFICATIONS

Accuracy	$\pm 2\%$ Full Scale
Ambient Limits	-40°F/130°F
Process Limits	-40°F/200°F

HIGH-ACCURACY INDUSTRIAL DIFFERENTIAL PRESSURE GAUGE

The REOTEMP Series D05/06 High Accuracy Bellows DP Gauge is a precise, easy-to-read, and rugged instrument built for the industrial markets. Available in a variety of wetted materials, this gauge is ideally suited for a variety of applications involving the differential pressure measurement of many process fluids.

D06

FEATURES / BENEFITS

- High Accuracy $\pm 1\%$ or $.5\%$ Full Scale
- Sensitive Bellows Measuring Element
- 270 Degree Dial Arc
- Differential Spans from 10" inH₂Od through 30 psid

SPECIFICATIONS

Accuracy	$\pm 1\%$ or $.5\%$ full scale
Ambient Limits	-40°F/130°F
Process Limits	-40°F/200°F
Process Limits with Diaphragm Seal	Series D05/06 cannot be mounted to a diaphragm seal. See series D40/42 for gauges mountable to a diaphragm seal.
Wetted Materials	Body: Aluminum, 316SS Internal Parts: 316SS Gasket/Seals: Buna, Viton, Teflon, Ethylene Propylene, or Silicone
Lens	Plastic (Standard) or Laminated Safety Glass
Other Materials	Dial Case: Engineered Plastic Dial: White Aluminum, Black Letters
Fillable	Yes
Maximum Working Pressure	3,000 psi - Aluminum Body 6,000 psi - 316SS Body
Environmental Protection	NEMA 4X/IP65

HIGH-ACCURACY INDUSTRIAL DIFFERENTIAL PRESSURE GAUGE

The REOTEMP Series D09, Bourdon Tube Style Differential Pressure Gauge is ideally suited for a broad range of applications requiring high accuracy and/or high differential pressure range. The large 6" dial with complete 270 degree dial arc makes the D09 the easiest to read differential pressure gauge.

D09

Fillable

Accuracy

FEATURES / BENEFITS

- High Accuracy $\pm 1\%$ or $.5\%$ Full Scale
- Sensitive Bourdon Tube Construction
- 270 Degree Dial Arc
- Differential Span Up to 6,000 psid

SPECIFICATIONS

Accuracy	$\pm 1\%$ or $.5\%$ full scale
Ambient Limits	$-40^{\circ}\text{F}/130^{\circ}\text{F}$
Process Limits	$-40^{\circ}\text{F}/200^{\circ}\text{F}$
Process Limits with Diaphragm Seal	Series D09 cannot be mounted to a diaphragm seal. See series D40/42 for gauges mountable to a diaphragm seal.
Wetted Materials	Body: Aluminum, 316SS, Brass, Carbon Steel Internal Parts: 316SS, Copper Alloy Gasket/Seals: Buna, Viton, Teflon, Ethylene Propylene, or Silicone
Lens	Plastic (Standard) or Laminated Safety Glass
Other Materials	Dial Case: Engineered Plastic Dial: White Aluminum, Black Letters
Fillable	Yes
Maximum Working Pressure	3,000 psi - Aluminum Body 6,000 psi - 316SS Body
Environmental Protection	NEMA 4X/IP65

REOTEMP's Hi-Vis dial increases the visibility of dial gauges in low-light environments and at a distance. Hi-Vis dials are often used in areas where gauge readings are paramount to safety of the process. They can also be used to differentiate between two different process lines within a facility.

Hi-Vis™

-HV Hi-Vis™ High Visibility Dial

Availability PR, PT, PG-S and PC

COLOR BANDS & COLOR PIES

Color bands and pies highlight a specific range on the gauge so that it is immediately apparent if the process falls within a critical pressure range.

-CB Color Band (Specify Colors and Ranges)

-CP Color Pie (Specify Colors and Ranges)

Availability PR, PT, PG, PC and DP Gauges

Color Band

Color Pie

CUSTOM LOGO DIAL

Pressure gauge dials offer a unique opportunity to communicate critical information, highlight installation specifications, or promote an OEM or end-user brand.

-CL Custom Logo Dial

Availability PR, PT, PG, PC and DP Gauges, Additional Models Available as Factory Order

Custom Logo

DIAL MARKING

Add text, a serial number, tag number, equipment class, or other text to the gauge dial face.

-DM Dial Marking

Availability PR, PT, PG, PC and DP Gauges, Additional Models Available as Factory Order

PRESSURE GAUGE OPTIONS

CASE FILL

Case Fill Ambient Temperature Limits

-G	Glycerin USP	40°F to 140°F
-W	Glycerin/Water (65/35)	-40°F to 140°F
-S	Silicone (1000cst)	-50°F to 150°F
-T	Teflon Coated Movement	-40°F to 150°F

POINTER

Min/Max Pointer with Fixed Adjustment

Red Set Hand

-MP	Min/Max Pointer with <u>Fixed</u> Adjustment Screw
-MQ	Min/Max Pointer with Tamper-proof Cap and Key
-RH	Red Set Hand, Manual Adjustment, Not a Drag Pointer (PT45P Case Only)
-RP	Red Pointer (STD with Hi-Vis™ Dial)

Availability PR25, PR40, PR60, PT45P, PG25, & PG40S

ELECTRICAL SWITCH CONTROLS

The electrical contacts option adds a convenient and durable switch option to the mechanical dial pressure gauge. The set pointer can be easily adjusted using a key on the outside of the dial. The pressure gauge pointer drags the switching contacts to either an open or closed position, based on how the user adjusts the contacts.

Electrical Contacts

Recommended Contact Loads

Voltage	Resistive		Inductive
	DC mA	AC mA	AC mA
220	40	45	25
110	80	90	45
48	120	170	70
24	200	350	100

Maximum load at 250V = 0.6A, for larger loads or to reverse action of switches, use of a relay is recommended.

-EC Electrical Contacts

Availability PR40 and PT45P (Case not liquid fillable with contacts)

CALIBRATION OPTIONS

- ✓ All gauge testing and calibrations are performed using NIST-traceable reference equipment.
- ✓ A point certificate (**-C3**, **-C5**, etc.) comes with a sticker on the case or lens with a unique test number and a calibration report with logged points.
- ✓ Upgraded accuracy (**-R1**, **-R2**, **-R5**) includes a notation on the dial and a calibration sticker, but no logged points.
- ✓ A calibration sticker (**-CS**) includes a sticker on the case or lens with a unique test number, but no logged points.

ASME
B40.100

All REOTEMP pressure gauges are designed, manufactured, and calibrated to ASME B40. All calibration reference equipment is NIST-traceable.

DIAPHRAGM SEALS

Manufactured in the USA under strict ISO 9001 quality standards, REOTEMP offers a broad variety of diaphragm seals for the industrial markets. REOTEMP Diaphragm Seals are carefully designed, built, and tested to maximize performance, increase instrument durability, and assure operator safety. Along with superior product quality, REOTEMP is proud to offer responsive customer service, intuitive online product configurators, and the industry's quickest lead times.

Diaphragm Seals are used in applications where the pressure sensor requires isolation from the process media. These applications may be corrosive, high temp, clogging, or require a sanitary fluid to remain captured in the piping or vessel. Rather than the process fluid interfacing with the pressure sensor, the pressure is exerted onto the flexible diaphragm and transmitted hydraulically to the instrument through the fill fluid. When properly mounted and filled a diaphragm seal assembly will have minimal effect on the instrument's performance.

APPLICATION CONSIDERATIONS

REOTEMP Diaphragm Seal Assemblies are carefully designed, built, and tested to maximize performance, increase instrument lifespan, and assure operator safety. The following should be considered when specifying a diaphragm seal:

1. Instrument Considerations

- Is there sufficient displacement to drive through its full range?
- Is the diaphragm sensitive enough for the measuring range and accuracy grade of the instrument?

2. Diaphragm Seal Mounting

- How will the diaphragm seal mount to the process? Threaded? Flanged? Clamped?
- How will the instrument mount to the diaphragm seal? Threaded? Welded?
- Will the instrument be mounted directly to the seal or with capillary?

3. Process Characteristics

- What are the pressure and temperature limits?
- Are there issues with clogging or high viscosity?
- Is there severe shock and pulsation?
- Is the process fluid compatible with the wetted material and gasket?

4. Ambient Characteristics

- Are there extreme or fluctuating ambient temperatures?
- Is the outside environment corrosive?

5. Vacuum Considerations

- Will the assembly be operating in deep vacuum (< 5psia)? If yes, contact the factory with process specifications.

Questions? If you require application assistance, please contact REOTEMP customer service or your local REOTEMP distributor.

REOTEMP SEAL FEATURES

You Tube Visit reotemp.com/youtube

COOLING TOWERS

High process temperatures are damaging to pressure instrument performance and could pose an imminent safety risk. REOTEMP cooling towers provide the best option for extending instrument lifespan, improving performance and minimizing safety risk.

See page 57 for diaphragm seal mounting codes or page 111 to purchase separately.

PULSATION PROTECTION

Process media pulsation is one of the most common causes of pressure gauge failure. REOTEMP's proprietary diaphragm seal feature, Pulse Plus™ dramatically reduces the effects of pulsation on mechanical pressure instruments.

Specify with option code **-PP** on most diaphragm seal models when a seal is being mounted to a REOTEMP pressure gauge.

PRESSURE AND TEMPERATURE REFERENCE TABLES

Threaded Diaphragm Seal Temperature Rating

Temperature Dissipation by Diaphragm Seal Mount Type

Note: Figures are approximate, based on installation with significant ambient airflow.

COMMON CONFIGURATIONS

The pressure instrument and diaphragm seal assemblies shown below are examples of completely filled and tested assemblies and their corresponding part numbers.

Instrument
PT45P1A2P20-G-T-HV (pg.7)

Seal
W51522SSS-TKDTD-AS (pg.59)

Application
The most common gauge seal assembly for threaded connections. For use with corrosive, clogging or moderately hot process media.

Instruments
PR35S1A4D25-D-T (pg.3)
TG1P25-1A4A00 (pg.101)

Seal
DSTC15SS4-TRM-AG (pg.79)

Application
For use in a sanitary or clean-in-place application where the user would like both a mechanical dial pressure gauge and electronic output on the same connection port.

Instrument
PC40S1A4M250-D-T (pg.13)

Seal
W7254R21SSS-TDTD-AS (pg.69)

Application
Low pressure gauge with a high accuracy diaphragm seal. For use with corrosive gas or liquid on a flanged connection.

Instrument
Customer Supplied In-Line Smart Pressure Transmitter

Seal
MS8QWM2XS-RTR-BH-R1 (pg.77)

Application
For use in high temperature service where a diaphragm seal is required to protect the pressure transmitter from process temperature as high as 750°F.

Instrument
PT45P1A2P17-D-T-TS (pg.7)

Seal
W51523SSC-TKA25-AS (pg.59)

Application
For use where the pressure measurement point is a long distance from where the operator can conveniently and safely read the gauge.

Instrument
Customer Supplied dP Transmitter

Seal
W9FFWR31S-W20-AS-RR (pg.71)

Application
For use monitoring tank level, measuring flow across an orifice plate, measuring pressure drop across a valve or filter, and other dP application. Flush diaphragm seals are most commonly used with process media that clogs or coagulates in limited flow areas and dead legs.

SMART TRANSMITTER ATTACHMENT

HOW TO ORDER: Unbalanced System Example

DIFFERENTIAL PRESSURE ASSEMBLY

Balanced System A complete assembly with one part number that includes two diaphragm seals, two capillaries, two fills, and one complete assembly calibration certificate.

Unbalanced DP System Where seal, mount, capillary, or fill is not identical. A complete assembly includes one diaphragm seal on the HP side AND one diaphragm seal on the LP side.

-RR

Identical system on HP and LP Sides, capillary exit through process connections. Capillary mounts only.

-RA

Identical system on HP and LP sides, capillary exit through face of cover flange. Capillary mounts only.

Example: W9FFWR31S-B10-AS-RA

-RH

Mount via Process Connections

Side High Pressure

-RL

Mount via Process Connections

Side Low Pressure

-RB

Mount via Face of Cover Flange

Side High Pressure

-RC

Mount via Face of Cover Flange

Side Low Pressure

GAUGE PRESSURE ASSEMBLY

In Line Pressure Transmitter

-R1

Mount to In-Line Gauge Pressure Transmitter. Direct or remote mount.

-R4

Horizontal Mount (Tank Mount) to In-Line Gauge Pressure Transmitter. Direct mount only.

Traditional Mount for Gauge Pressure Seal mount on one side only, other side is vented.

-R2

Instrument mount through process connections, HP Side. Use "R3" if mounting to LP side

-R8

Instrument mount through face of cover flange, HP Side. Use "R9" if mounting to LP Side

DIAPHRAGM SEAL ASSEMBLY TO SMART TRANSMITTERS

REOTEMP specializes in the unique craft of assembling diaphragm seals to field transmitters for the purpose of measuring pressure, differential pressure, level, and flow. As a trusted supplier to many of the world's leading transmitter manufacturers, REOTEMP can assemble a diaphragm seal system to virtually any make or model transmitter. Every transmitter mount includes the features below to ensure superior performance and durability for every assembly. REOTEMP also offers repair, refurbishment or replacement of used transmitters with remote seals.

STANDARD FEATURES ON ALL REOTEMP ASSEMBLIES

INSTRUMENT MOUNTING CONFIGURATIONS

DIRECT MOUNT

Direct Mounting a pressure gauge, switch, or transmitter is the most common diaphragm seal assembly.

Code	Description	Max. Temp
-DTD	Threaded Instrument Connection	400°F
-DWD	Welded Instrument Connection	600°F

Assembly Notes: Welded connection recommended for pressure exceeding 1,500 psi for purposes of leak prevention.

COOLING ELEMENTS

Used in either high temp or cold temp applications, Cooling Elements mounted above diaphragm seals quickly normalize fluid temperature toward ambient. This protects the pressure instrument while still maintaining the convenience of a direct mount.

Code	Description	Max. Temp
-RTR	6" Cooling Tower	750°F
-STW	3" Cooling Standoff	600°F

Assembly Notes: Cooling elements are welded to diaphragm seal. Instruments are threaded to cooling element unless specified. All lengths are nominal.

REMOTE MOUNT

Remote Mounting a pressure instrument using flexible capillary is a common mounting method when the point of measurement is in a hazardous or inconvenient location.

Code	Description	Max. Temp
-P??	PVC Coated SS Armor, Threaded to Seal	400°F
-W??	PVC Coated SS Armor, Welded to Seal	600°F
-A??	SS Flexible Armor, Threaded to Seal	400°F
-B??	SS Flexible Armor, Welded to Seal	750°F

Note: ?? = Length in feet (e.g. 05 = 5 feet)

Assembly Notes: Capillary has a 2mm inner diameter unless specified differently by customer. Ambient temp limit of PVC coated armor is 250°F. Standard instrument connection is threaded (Smart Transmitters are welded), unless specified by customer.

TREE ASSEMBLIES

Tree Assemblies offer the ability to mount two pressure instruments onto one diaphragm seal, allowing the user to gain both a local indication and a remote signal without adding an additional pipe insertion.

Code	Description	Max. Temp
-TRE	Goal Post, Low Pressure Assembly (Max. 150 psi)	400°F
-TRX	Goal Post, Heavy Duty (Max. 3,000 psi)	600°F
-TRM	Compact Tree Assembly (Max. 3,000 psi)	600°F

Assembly Notes: Threaded joints are fully welded for consistent instrument orientation. Instrument connections are threaded unless specified by customer. Diaphragm seal must displace enough fluid to drive both instruments.

FILL GUIDE

Diaphragm seals are designed to protect pressure instruments from hot process media and corrosive chemicals while minimizing any negative effect on instrument accuracy and durability. A well-made diaphragm seal can achieve this goal only if it is properly assembled, filled, and tested. REOTEMP's highly trained technicians use state-of-the-art equipment so that every diaphragm seal assembly is filled and tested to assure optimal instrument performance:

- ✓ 24-hour Minimum Fluid De-gassing
- ✓ Evacuated Instrument Chamber Up to 10⁻⁸ mbar Absolute
- ✓ Complete Fill Integrity Check
- ✓ Fill-port Leak Test
- ✓ Post-fill Static Test
- ✓ Verification of Instrument Calibration
- ✓ High-temp Pipe Sealant Used on All Threaded Joints
- (Welded Joints Upon Request)
- ✓ Tamper-proof (Inspection Seal) Lacquer used on All Threaded Joints
- ✓ Sturdy Diaphragm Packaging Protection

Part Number Code	Name	Description	Temperature Range (Vacuum Service <5psia)	Pulse+™	Viscosity cst @ ~77°F	Specific Gravity @ ~77°F	Thermal Expansion cc/cc/°C
STANDARD FILL FLUID							
AS	Silicone DC200 ¹	This is the standard fill fluid for most diaphragm seal applications.	-40°F to 400°F (-40°F to 250°F)	Yes	20	0.94	.00104
HIGH TEMP SILICONE							
BH	Silicone DC704 ¹	Standard for Smart Transmitters and capillary systems. Performs well in applications with high temperature and a deep vacuum.	0°F to 650°F (0°F to 450°F)	No	44	1.07	.00077
B1	Silicone DC710 ¹	Highest temperature rating; ideal for gauge seal assemblies. Too thick for capillary assemblies. Response time can become very slow in cold conditions.	50°F to 750°F (50°F to 400°F)	Yes	500	1.11	.00043
C8	Syltherm 800 ²	Low viscosity allows it to perform well in both low and high temperatures. Not recommended for vacuum service or at high temperatures when under low static pressure.	-40°F to 750°F (-40°F to 150°F)	No	9.5	0.93	.00136
B5	Silicone DC705 ¹	Performs very well in high temperatures when under vacuum. The high viscosity and freezing point of this fluid makes it a poor choice for cold or outdoor installations without heat tracing.	50°F to 675°F (50°F to 550°F)	Yes	175	1.09	.00096
B2	Silicone DC550 ¹	Similar high temperature performance as DC705, however it performs better at lower temperatures.	-40°F to 575°F (-40°F to 400°F)	No	125	1.07	.00076
FOOD GRADE							
AG	Glycerin USP	This is the standard fill fluid for most gauge seal assemblies for food, beverage, and pharmaceutical applications. Its high viscosity will cause very slow response at times in low temperature and outdoor installations.	60°F to 450°F (Not Suitable)	Yes	1100	1.26	.00061
BN	NEOBEE M20 ⁷	Low viscosity and a wide temperature range makes this the standard sanitary fill fluid for Smart Transmitters and capillary systems.	-10°F to 400°F (-10°F to 200°F)	No	10	0.92	.00101
BS	Food Grade Silicone	Highest temperature limit for food grade fluids. Because of its high viscosity it does not perform well in low temperatures.	20°F to 550°F (20°F to 250°F)	Yes	350	0.97	.00096
BP	Propylene Glycol	This is the fill fluid used when Glycol is called for on the customer specification. It has a very narrow temperature range.	0°F to 200°F (Not Suitable)	No	2.85	1.03	.00073
INERT (TYPICALLY FOR CHLORINE AND OXYGEN APPLICATIONS OR IN SILICONE-FREE ENVIRONMENTS)							
C1	Fomblin Y06 ⁴	Ideal inert fluid for transmitter applications. Relatively high vapor pressure above 200°F. Not recommended for use in high temperature situations with low static pressure.	-40°F to 450°F (0°F to 250°F)	No	71	1.88	.00086
C2	Halocarbon 6.3 ³	Standard inert fluid used in gauge seal assemblies.	-40°F to 400°F (-40°F to 200°F)	Yes	6.3	1.97	.00084
C3	Halocarbon 1.8 ³	Typically used in low temperature applications because of its low viscosity.	-110°F to 220°F (-100°F to 100°F)	No	1.8	1.82	.00084
C4	Fluorolube FS-5 ⁵	Similar performance to Halocarbon 6.3, however not suitable for vacuum service.	-40°F to 450°F (Not Suitable)	No	5	1.86	.00087
SPECIALTY							
CK	Krytox 1506 ⁶	Specialty fill fluid, inert.	-40°F to 350°F (-40°F to 300°F)	No	62	1.88	.00095
BE	Ethylene Glycol	Occasionally used in annular (O-ring) seal assemblies.	-25°F to 320°F (Not Suitable)	No	30	1.10	.00062

THREADED OFFLINE WELDED DIAPHRAGM SEALS

REOTEMP's Threaded Offline Welded Diaphragm Seals are designed with an upper and lower housing bolted together with a diaphragm welded to the upper housing. This removable design allows for easy cleanout of the seal chamber, while still maintaining the system fill. The threaded offline diaphragm seal can be adapted to fit almost any pressure instrument and process application.

DIAPHRAGM SEALS

FEATURES / BENEFITS

- Welded Diaphragm for Maximum Durability
- Wide Variety of Diaphragm and Material Options
- Continuous-duty Disc Protects from Process Fluid Leaking in the Event of a System Breach
- Easy Cleanout of Diaphragm Cavity without Compromising Filled System

Standard Pressure

Heavy Duty

Note: All drawings depict a single 1/4" NPT Flush Port (optional). Drawing are not to scale. Contact REOTEMP customer service for more detailed drawings.

SPECIFICATIONS

Diaphragm	316SS, Hast C-276, Tantalum, Monel, or others
Lower Housing	316SS, Hast C-276, Monel, CPVC, or others
Gasket	PTFE, Grafoil, Kalrez, or Klinger
Upper Housing	316SS or Nickel-plated Carbon Steel

Important Note on Choosing a Lower Housing: Reotemp recommends the use of metallic lower housings when process compatibility allows. Before specifying a non-metallic lower housing, users should be familiar with the material characteristics and risks of non-metallic materials including leaking, cracking, flowing and other issues that can affect durability and performance.

THREADED OFFLINE NON-METALLIC DIAPHRAGM SEALS

REOTEMP's Threaded Offline Non-Metallic Diaphragm Seals are designed with an upper and lower housing bolted together with a Teflon or Viton diaphragm bonded to the upper housing. This design allows for the lower housing to be removed for easy cleanout of the seal chamber while still maintaining the system fill. The Teflon and Viton diaphragms are ideal for protecting the pressure instrument from corrosive process fluid.

Viton Diaphragm, Lower Ring Style

HIGH ACCURACY THREADED DIAPHRAGM SEALS

REOTEMP's High Accuracy and High Displacement Threaded Diaphragm Seals are ideal for applications where high sensitivity or large fluid displacement is key to proper instrument performance. Designed with a diaphragm welded to the upper housing, the lower housing is detachable from the seal body allowing for easy cleanout of the process cavity without losing system fill. The High Accuracy Threaded Diaphragm Seal is most commonly mounted to Smart Transmitters (Gauge, Differential, and Absolute pressure), low pressure capsule gauges, mechanical DP gauges, and mechanical pressure switches.

W71

FEATURES / BENEFITS

- Extra Large 4.1" Diaphragm for Maximum Sensitivity
- Wide Variety of Wetted Material Options
- 100% Helium Leak Tested Diaphragm Welds
- Easy Cleanout Design with Multiple Flush Port Options

THREADED FLUSH FACE DIAPHRAGM SEALS

DSTF

REOTEMP's Threaded Flush Face Seals are ideal for high and medium pressure applications where process media clogging is a concern. The diaphragm is welded onto the end of the threads allowing for continuous flow of process media across the diaphragm and preventing any build-up of solids. Selection of process connection will greatly impact accuracy and temperature sensitivity.

SPECIFICATIONS

Wetted Materials Body: 316SS, Hast-C
Diaphragm: 316SS, Hast-C

Process Temperature Limits

Process Connection	1/2"	3/4"	1"	1.5"/2"
Limit	0/150°F	20/200°F	-40/400°F	-40/600°F

NOTE: Always use largest thread possible for smaller temperature effect.

Ambient Temperature Limits Determined by the pressure instrument.

Minimum Recommended Span

Male Process Thread NPT	1/2"	3/4"	1"	1.5"/2"
2.5" & 3.5" Gauges	60 psi	30 psi	15 psi	15 psi
4", 4.5", & 6" Gauges	n/a	n/a	100 psi	30 psi
Transmitter (Gauge Pressure)	60 psi*	15 psi*	10 psi*	5 psi
Transmitter (Differential Pressure)	n/a	n/a	n/a	n/a

*Not Recommended for Critical Transmitter Applications.

Maximum Working Pressure Determined by the seal threads.

ISOLATION RING FLOW THRU SEAL

ORR

The REOTEMP Isolation Ring Flow Thru Seal boasts an In-Line Flow-Thru design ideal for waste water, slurries, or abrasives. Mounted between pipe flanges or threaded in-line, it has a tough but sensitive elastomer lining. One unique feature of this seal is the ability to mount multiple instruments on one seal.

WELDED MINI-SEAL

REOTEMP Welded Mini Seals are ideal for applications where a gauge or general purpose transmitter cannot be installed directly into the process media. REOTEMP mini seals are a one-piece, all-welded construction that offer a durable, economical choice for protecting a pressure instrument from corrosion, clogging, or high process temperatures.

INSTRUMENT VALVES & MANIFOLDS

Design: REOTEMP offers a full line of USA made instrument valves and manifolds. Whether your need is to safely remove instrumentation, pressure check or calibrate your process, test differential gauges/transmitters, or throttle flow in the system Reotemp has a valve to suit your application.

Quality: REOTEMP is a globally recognized ISO 9001:2008 manufacturer of pressure instrumentation. All instrument valves conform to MSS SP-99 standards, and all valves with packing conform to MSS SP-132 packing standards. All valves and manifolds are helium leak checked to 1×10^{-4} ml/s for ultimate performance. REOTEMP warrants all US made valves against defective workmanship or materials under normal use and service for three years following the date of shipment.

Additional Testing Services: Other in-house services include Mill Test Reports (MTRs), Positive Material Identification (PMI), Hydrostatic Testing, and Oxygen Cleaning (O_2).

Configurations: Standard body materials include 316SS and zinc-plated carbon steel. Other non-standard materials are available upon request and may require a custom design and build. Various connections sizes are available from 1/8" – 2" NPT on most needle valve configurations. Gauge valves are available with connections from 1/4" – 3/4" NPT.

Instrument/Valve Mounting Options:

REOTEMP offers in house mounting services by pre-installing pressure instrumentation on valve assemblies prior to shipping to allow for quick and easy installation. REOTEMP mounting services are available when mounting your REOTEMP pressure instrument to a REOTEMP gauge valve, or when mounting a REOTEMP differential pressure gauge on a 3 or 5 valve manifold. Select from a variety of options and orientations.

INSTRUMENT & VALVE ASSEMBLIES

REOTEMP offers in house mounting services by preinstalling pressure (or dP) instrumentation on valve assemblies prior to shipping to allow for stress free/easy installation. Select from a variety of standard designs or contact your REOTEMP customer service representative to design a custom assembly to suit your desired application.

- ✓ Inspector's Lacquer & Threads Sealed with Loctite 567™
- ✓ 100% Argon Leak Checked (Maximum 1,000 psi)
- ✓ Optional ID Tag for Complete Assembly
- ✓ Packaged for Out of Box Installation
- ✓ DP Assemblies Mounted with 316SS Compression Fittings & 316 Tubing
- ✓ To Customize Your Design Contact REOTEMP Customer Service

VALVES

SINGLE VALVE BLOCK & BLEED

Male-Female

Female-Female

REOTEMP's single valve block and bleed allows users to isolate pressure to their instrument, bleed off excess process, and remove an instrument without disturbing or shutting down the system. A variety of options are available to suit just about every application.

FEATURES / BENEFITS

- 0.090" Bleed Hole Controlled by a 1/4"-20 UNF-2A Bleed Screw
- FKM O-ring Seal and PTFE Back-up Ring Below the Stem Threads to Protect from Corrosion and Galling; Soft Seat Comes Standard with Delrin Seat
- PTFE or Grafoil Packing Optional
- All Stems are 316SS
- Vinyl Dust Cap for Bonnet & Stem (Non-packing)
- Rolled Threads for Strength Durability, and Ease of Use
- All Valves are Helium Leak Tested for Optimal Performance

SPECIFICATIONS

Body Material	316 Stainless Steel, Zinc-nickel Plated Carbon Steel
Pressure Rating	Hard Seat - 10,000 psi at 200°F, Soft Seat - 6,000 psi at 200°F.
Temperature Rating	Standard up to 200°F; Available up to 1,000°F. See Pressure/Temperature Charts on Page 97 for More Detailed Information.
Orifice	0.187"
Flow	Hard Seat C _v : 0.44, Soft Seat C _v : 0.76
Connections	1/4" or 1/2"

HOW TO ORDER: Choose options to build a part number. For example: **G10H22S-P1NC**

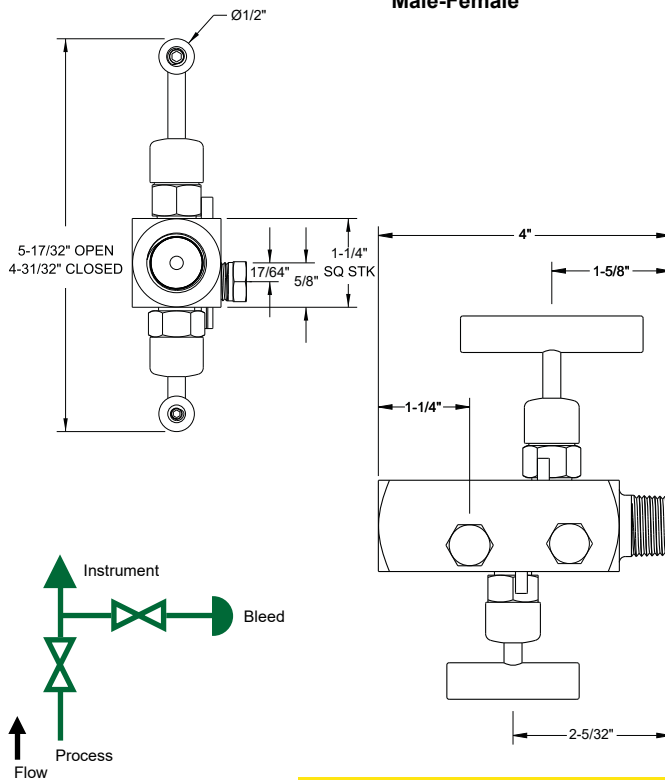

MODEL	SEAT TYPE	CONNECTION SIZE	MATERIAL	OPTIONS
G10	H	22	S	-P1NC*
G10 = Single Valve Block & Bleed	H = Hard Seat S = Soft Seat	44 = 1/4" MxF 4F = 1/4" FxF 22 = 1/2" MxF 2F = 1/2" FxF	C = Carbon Steel S = Stainless Steel H = Hastelloy C M = Monel	Available on G10: -P1 = PTFE Packaging Available on G10H: -P2 = Grafoil Packing (316SS Body Rating 1,000°F at 1,500 psi)

*See 98 for Additional Options

2-VALVE BLOCK & BLEED

Male-Female

REOTEMP's 2-Valve Block & Bleed allows users more options to control their venting. The secondary valve bleeds process through 1/4" FNPT port giving the user the ability to vent to atmosphere or capture the process by directly piping to the valve body.

FEATURES / BENEFITS

- 1/4" FNPT Bleed Port
- FKM O-ring Seal and PTFE Back-up Ring Below the Stem Threads to Protect from Corrosion and Galling; Soft Seat comes Standard with Delrin Seat
- PTFE or Grafoil Packing Optional
- All Stems are 316SS
- Vinyl Dust Cap for Bonnet & Stem (Non-packing)
- Rolled Threads for Strength, Durability, and Ease of Use
- All Valves are Helium Leak Tested for Optimal Performance

SPECIFICATIONS

Body Material	316 Stainless Steel, Zinc-nickel Plated Carbon Steel
Pressure Rating	Hard Seat - 10,000 psi at 200°F, Soft Seat - 6,000 psi at 200°F.
Temperature Rating	Standard up to 200°F; Available up to 1,000°F. See Pressure/Temperature Charts on Page 97 for More Detailed Information.
Orifice	0.187"
Flow	Hard Seat C _v : 0.44, Soft Seat C _v : 0.76
Connections	1/4" or 1/2"

HOW TO ORDER: Choose options to build a part number. For example: **G20H22S-P2NC**

MODEL	SEAT TYPE	CONNECTION SIZE	MATERIAL	OPTIONS

*See 98 for Additional Options

DOUBLE BLOCK & BLEED

REOTEMP's Double Block & Bleed allows users more options to control their venting as well as added safety when removing instruments. This valve features an additional shutoff valve between the vent and the instrument. A bleed valve allows users to bleed the process through a 1/4" FNPT port, giving the ability to vent to atmosphere or capture the process by directly piping to the valve body.

FEATURES / BENEFITS

- 1/4" FNPT Bleed Port
- FKM O-ring Seal and PTFE Back-up Ring Below the Stem Threads to Protect from Corrosion and Galling
- PTFE or Grafoil Packing Optional
- All Stems are 316SS
- Vinyl Dust Cap for Bonnet & Stem (Non-packing)
- Rolled Threads for Strength, Durability, and Ease of Use
- All Valves are Helium Leak Tested for Optimal Performance

SPECIFICATIONS

Body Material	316 Stainless Steel, Zinc-nickel Plated Carbon Steel
Pressure Rating	Hard Seat - 10,000 psi at 200°F
Temperature Rating	Standard up to 200°F; Available up to 1,000°F. See Pressure/Temperature Charts on Page 97 for More Detailed Information.

MULTIPORT BLOCK & BLEED

Need flexibility when installing your instruments? REOTEMP's Multiport Gauge Valve features a single shutoff along with three individual 1/2" FNPT instrument ports expanding instrument installation and venting options. The user can select from a variety of bleeds, valves, and plugs to obtain their desired setup.

FEATURES / BENEFITS

- 3 - 1/2" FNPT Instrument Ports
- FKM O-ring Seal and PTFE Back-up Ring Below the Stem Threads to Protect from Corrosion and Galling; Soft Seat Comes Standard With Delrin Seat
- PTFE or Grafoil Packing Optional
- All Stems are 316SS
- Vinyl Dust Cap for Bonnet & Stem (Non-packing)
- Rolled Threads for Strength, Durability, and Ease of Use
- All Valves are Helium Leak Tested for Optimal Performance

SPECIFICATIONS

NEEDLE VALVES

Bidirectional Flow (Soft Seat)
Unidirectional Flow (Hard Seat)

REOTEMP needle valves allow users to isolate pressure to their instrument and remove the instrument without disturbing or shutting down the system. A variety of options are available to suit just about every application.

FEATURES / BENEFITS

- FKM O-ring Seal and PTFE Back-up Ring Below the Stem Threads to Protect from Corrosion and Galling; Soft Seat Comes Standard With Delrin Seat
- PTFE or Grafoil Packing Optional
- All Stems are 316SS

VALVES

PRESSURE TRANSMITTERS

REOTEMP Pressure Transmitters and Transducers all convert applied pressure to an electrical signal that can be interpreted by a computer or other interpretive device, where it can be used to display or control a process variable.

Output: REOTEMP transmitters produce either a 4-20 mA signal (the most common output), or a variety of voltage outputs, such as 1-5 Vdc or 0-10 Vdc (3-wire).

Sensors: Piezoresistive diffused semiconductor technology is standard for pressures up to 300 psi. For higher pressures (up to 60,000 psi), sputtered thin film technology is used. These sensors are very stable, shock resistant, and durable. Our piezoresistive and thin-film sensors are made with no epoxies or bonding agents, virtually eliminating signal instability or drift.

Unit Integrity: Sensor durability, along with mechanical integrity of the stainless case and all-welded process connection, produce a rugged instrument designed to provide consistent performance under severe industrial conditions.

Accuracy: Accuracies from 0.5% to 0.1% are available. Each unit is temperature compensated to provide stable accuracy over large ambient variations and long periods of time.

Ready-to-go: Each REOTEMP transmitter is inspected and calibrated prior to shipment to assure it is 100% "Ready-to-go," right out of the box!

Large Transmitter Stock: REOTEMP stocks many transmitter models in a large variety of ranges. However, the most popular output is the 4-20 mA output.

Transmitter or Transducer? "Transmitter" is often used when referring to a pressure sensor with variable current (mA) output, whereas "Transducer" usually implies voltage output. For simplicity, we use the term "transmitter" for all sensors offered in this catalog.

SELECTING A TRANSMITTER

Consider the following issues to choose the best pressure transmitter for your application:

1. Special Applications

Series **TG** (general purpose transmitter) is a good choice for general industrial applications. For special applications or circumstances, other models will be more suitable:

High Accuracy	TH	Choose series TH for up to 0.125% accuracy (BFSL). For reference, the standard TG accuracy is 0.5%.
Hazardous Environments	TE	Series TE for explosion proof environments and THX for intrinsically safe.
Total Submersion	TL	Choose series TL .
Clogging Media	TG	Consider series TG mounted to a diaphragm seal.
Sanitary Applications	TS	Choose series TS , which comes with a sanitary Tri-clamp connection.
Low Cost	TM	For OEM use or for applications where low cost is a necessity, consider series TM .

2. Pressure Range & Overpressure

Choose a range that places your working pressure at 50% to 90% of the transmitter pressure range. After exposure to pressures up to **proof pressure**, the transmitter should return to normal operating performance within specifications. After exposure to pressures **above proof pressure, but below burst pressure**, the transmitter may be damaged and not perform to specification after return to operating range. Exposure to **pressure beyond burst pressure** may cause rupture of the transmitter.

3. Accuracy

Series **TG**, with 0.5% BFSL accuracy, and with 0.05% repeatability, suits many industrial applications. Higher accuracies (0.25% and 0.1%) are available, generally at higher cost.

What is BFSL? BFSL is "Best Fit Straight Line". It expresses maximum deviation from a straight line positioned to minimize maximum deviation.

4. Output

Current output (4 mA to 20 mA) is the most popular for industrial use. This is because this output range is less susceptible to electrical noise and can be transmitted through copper wires up to thousands of feet with little signal loss. Several voltage outputs are also available, and are suitable for shorter distances. Typical **voltage outputs** include 0-5 Vdc, 1-5 Vdc, and 0-10 Vdc.

5. Process Connection

¼" NPT and ½" NPT are the most common connections in industrial process applications. In hydraulic applications, 7/16-20 UNF SAE male with o-ring seal is commonly used. For sanitary applications, Tri-clamp connections on the **TS** series are available in several sizes, with 1-½" Tri-clamp the most common.

6. Electrical Connection

All REOTEMP transmitters require wire hookup for both power and output. 4-20 mA output uses 2 wires, which carry both loop power and output signal (loop current). Voltage output usually uses three wires, with 4 wires available. The standard Hirschmann connector (Din 43650) in standard or mini-size allows easy connection to 2, 3 or 4 wires, with internal screw terminals and cable gland. Also available are sealed integral cable (with or without ½" NPT male conduit threads), Bendix 4- and 6-pin, and M12 types, as well as a Hirschmann with ½" NPT female conduit connection.

7. Severe Conditions

REOTEMP transmitters are rugged instruments intended for industrial use. However, temperatures, corrosion, vibration, or pulsation beyond operational limits should be addressed to prolong the life of the instrument:

<i>Problem</i>	<i>Solution</i>
High Process Temperature	Temperature at the instrument can be lowered by using a dead-leg extension. For high temperature with clogging media, a diaphragm seal with capillary or a cooling tower can also be used.
High Ambient Temperature	The instrument can be removed from the hot zone using piping, tubing, or capillary with a diaphragm seal.
Corrosive Media	A chemically compatible diaphragm seal can isolate the transmitter from the corrosive media.
Pulsation	Pressure fluctuations in an incompressible fluid can cause damaging pulsation (such as water hammer). This is a common cause of failure in pressure transducers, and measures should be taken to avoid this condition. Use of a snubber or restrictor screw (threaded orifice) should be considered.

GENERAL PURPOSE TRANSMITTER

TG

TG with 1/2" Flush Face Diaphragm

Diaphragm Seal
Compatible

FEATURES / BENEFITS

- 0.5% or 0.25% Accuracy
- All-stainless Welded Body and Wetted Parts
- 4-20 mA or Voltage Output
- Rugged, with Protection from Shock, Over-range, and Over-voltage, Internals Potted in Silicone Gel
- Internal Zero and Span Adjustments

SPECIFICATIONS

Output Signal 4-20mA, 2-wire (standard), 0-5V, 0-10V, 1-6V, or 1-11Vdc (3-wire)

Pressure Ranges Vacuum, compound, pressure to 15,000 psi; gauge and absolute

	Proof Pressure	Burst Pressure
0/5 - 0/200 psi	3 x range	3.8 x range
0/300 - 0/10,000 psi	1.75 x range	4 x range
0/15,000 psi	1.5 x range	3 x range

Accuracy (BFSL) ±0.5% of span (standard), ±0.25% of span (optional)

Adjustment ±10% full scale, zero & span

Input 12-30 Vdc (for current output), 14-30 Vdc (for voltage output)

Temperature Compensated: 32 to 175°F
Effect: ±0.02% of span/°F
Media: -22 to 212°F
Ambient: -40 to 185°F

Weight Approximately 3.5 oz

Environmental Rating IP65

TG (case style 1)

Note: Dimensions are nominal and may vary. Check with REOTEMP sales if dimensions are critical. Other case styles available.

SANITARY PRESSURE TRANSMITTER

TSB

FEATURES / BENEFITS

- 3-A, Tri-Clamp® Sanitary Connection
- 316 Stainless Wetted parts
- Designed for "Clean-in-place" and "Sterilize-in-place" Procedures
- Media Temperatures Up to 750°F
- Internal Zero & Span Adjustments

SPECIFICATIONS

Output Signal 4-20mA, 2-wire (standard), 1-5Vdc, 1-6Vdc, or 1-11Vdc (3-wire)

Pressure Ranges Vacuum, compound, pressure 0/2 to 0/1000 PSI gauge and absolute. Ranges 60 psi and below not recommended with 3/4" Tri-Clamp.

	Proof Pressure	Burst Pressure
0/5 - 0/200 psi	3 x range	3.8 x range
0/300 - 0/1,000 psi	1.75 x range	4 x range

Accuracy (BFSL) ±1.0% of span, ±0.5% of span, or ±0.25% of span

Adjustment ±5% full scale, zero & span

Input 10-30 Vdc (for current output), 14-30 Vdc (for voltage output)

Temperature Temperature effect with 1.5" or 2" Tri-Clamp: ±0.1% of span/10°F (for zero and span) or ±0.02 psi/10°F (greater of)
Note: 3/4" tri-clamp not recommended for temperature variations. Effect is ≤ ±0.9 psi/10°F

	3"	T									

*Total gauge span is additive of negative and positive pressures. Example: -15 - 0 - 30 psi = 45 psi span

- Assembly will function correctly with minimal accuracy degradation.
- T Assembly will function correctly given stable process temperature.
- S Assembly is highly sensitive to orientation and temperature variance. REOTEMP cannot guarantee a stated accuracy.
- X Assembly not offered.

Tri-Clamp® is a registered trademark of Alpha Laval Inc.

SUBMERSIBLE LEVEL TRANSMITTER

TL1

FEATURES / BENEFITS

- Accurate Level Measurements from 5" WC to 300 psi
- 316SS and Polyurethane Wetted Parts
- $\pm 0.25\%$ or $\pm 0.125\%$ Accuracy
- Vented, Strong Submersible Cable
- Lightning, Short Circuit, and Reverse Polarity Protection
- NEMA 6/IP68 Protection, Submersible to 1,000 ft.

SPECIFICATIONS

Output Signal	4-20mA, 2-wire 0-5Vdc, 0-10Vdc, or 0.5-2.5Vdc (3-wire)
Pressure Ranges	0-2 psi through 0-500 psi
Proof Pressure	2x Range
Burst Pressure	4x Range
Accuracy (BFSL)	$\pm 0.25\%$ of span (standard) $\pm 0.125\%$ of span (standard)
Input	12-30Vdc (for current output) 14-30Vdc (for Vdc output) 6Vdc (for 0.05-2.5Vdc output)
Temperature	Compensated: 32 to 122°F Effect: $\pm 0.01\%$ of span/°F (on zero and span) Media: -14 to 175°F
Environmental Rating	NEMA 6, IP68 (submersible to 1,000 ft.)
Electrical Protection	Reverse polarity, short circuit, and lightning protection
Submersible Cable	Vented, watertight, polyurethane jacketed, tensile strength: maximum 220 lbs.
Wetted Parts	316 SS, Cable: Polyurethane (teflon available), Nose Cone: Polyamide

TL1 (case style 1)

Note: Dimensions are nominal and may vary. Check with REOTEMP sales if dimensions are critical. Other case styles available.

TRANSMITTER TECHNICAL REFERENCE

SPECIFICATIONS

Wetted Parts: Body: 316 SS for ranges under 400 psi, high pressure ranges 17-4PH SS diaphragm and 300 series SS pressure chamber.

Repeatability: 0.05% of scale (model TM, 0.2%)

Hysteresis: 0.1% full-scale

Stability: 0.2% full-scale (model TM, 0.5%)

Burst Pressure: 4 x range

Response Time: <1 ms (between 10-90% of scale), Model TM: <5ms

Operating Life: 100 million cycles

Electromagnetic Rating: CE compliant to EMC norm, EN61326:1997/A1:1998, RFI, EMI and ESD protection

Electrical Protection: Reverse Polarity, over voltage, and short circuit protection

SHOCK: Less than $\pm 0.05\%$ full-scale effect for 1,000 g's @ 2ms on any axis (model TM: 600 g's)

Vibration: Less than $\pm 0.01\%$ full scale effect for 15 g's @ 0-2,000 Hz on any axis (model TG: less than 0.05% full scale effect for 20 g's @ 5-2,000 Hz on any axis.)

Temperature Range for Storage: -40-212°F

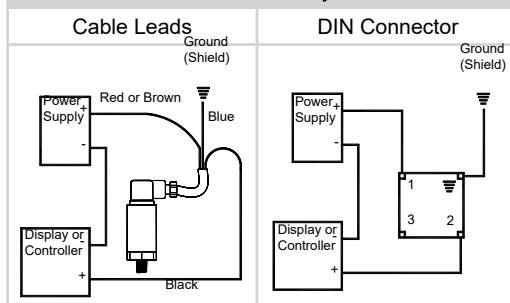

Environmental Protection: NEMA 4x (IP65), Series TL: NEMA 6, IP68

Proof Pressure: At Proof Pressure, zero and span may shift but no permanent damage has occurred.

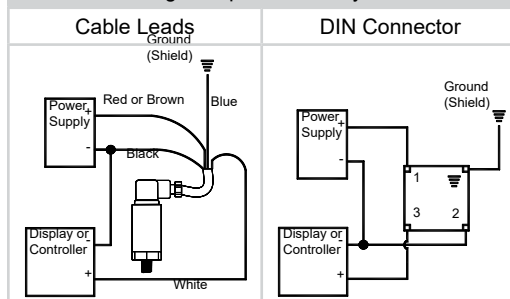

Burst Pressure: At Burst Pressure, permanent non-recoverable damage may occur.

MECHANICAL PRESSURE SWITCH

PS

REOTEMP's Mechanical Pressure Switches are suited for a variety of process applications where electrical devices must be turned on or off, in response to changing process pressure.

Diaphragm Seal
Compatible

FEATURES / BENEFITS

- Reliable Piston-Actuated, Force Balanced Construction
- Rugged, High Cycle Rate Tolerance
- Precise Resolution of Set Points
- Field-adjustable Set Points
- Simple Installation Requiring no Special Tools
- Long Service Life - no Required Periodic Service, no Spare Parts Required
- UL, CSA Certified Switching Elements

SPECIFICATIONS

Switching Elements	SPDT or DPDT
Current Capacity	15A at 250VAC; 5A at 30VAC
Housing	NEMA4, 4X, or Explosion Proof (Class. 1, Group C&D; Class. 2, Group E,F,G, Division 1,2)
Electrical Outlet	3/4" NPTF
Adjustable Setpoints	From full vacuum to 550 psi.
Wetted Diaphragm	Teflon/Buna, 316SS/Viton.
Wetted Pressure Points	316SS, Aluminum, Cast Iron
Overrange	200 psi to 1,500 psi
Warranty	3 years

Note: Specifications are for standard switches shown on next page. A wide variety of alternative housings, ranges, switches, wetted parts and options are available.

COOLING TOWERS

REOTEMP Cooling Towers protect pressure instruments from extremely hot process media without the pain and hassle of remote mounting the instrument. It is specifically designed to mount above a diaphragm seal or thread directly into the process. REOTEMP's unique design can reduce the process temperature by up to 600°F!

SPECIFICATIONS

- Protects Pressure Instruments from High Process Temperatures
- Reduces Temperature while Maintaining a Direct Mount
- Fully Welded, 316 Stainless Steel Construction

Application Notes

- Cooling towers may be threaded directly into process media in applications where the fluid viscosity is low enough to flow through a 3mm ID tube without clogging. For best performance, mount a cooling tower above a diaphragm seal.
- If mounting between a pressure instrument and diaphragm seal, use a 3-digit mounting code in the diaphragm seal part number (pg.57)
- Pigtail siphons (pg.113) or diaphragm seals should be used for steam service.

Performance of Cooling Elements

HOW TO ORDER: Choose options to build a part number. For example: **STW4M4M**

MODEL	INSTRUMENT CONNECTION	PROCESS CONNECTION
STW	4M	4M
RTR = Cooling Tower	4M = 1/4" Male NPT	4M = 1/4" Male NPT
STW = Cooling Standoff	4F = 1/4" Female NPT	2M = 1/2" Male NPT
	2M = 1/2" Male NPT	
	2F = 1/2" Female NPT	

	Temperature °F	RTR psi	STW psi
Maximum Working Pressure	200	5000	5000
	500	3500	3500
	800	1000	1500

Maximum working temperature is 800°F.

SNUBBERS

REOTEMP snubbers are a simple cost-effective solution for harmful pressure surges and pulsation. When a REOTEMP snubber is installed, it absorbs pulsation and surges. This protects your instrumentation and stabilizes the pointer for easier readings. Snubbers are available in either an adjustable self-cleaning piston design or an economical porous disk design.

POROUS DISK TYPE

Max. PSI	NPT	Porosity	Material	Part #
5,000	1/4"	Liquid	Brass	PXS-722BE
		Gas		PXS-722BG
	1/2"	Liquid		PXS-723BE
		Gas		PXS-723BG
15,000	1/4"	Liquid	303SS	PXS-722SE
		Gas		PXS-722SG
	1/2"	Liquid		PXS-723SE
		Gas		PXS-723SG

- The Economical Choice for Non-clogging Applications
- Multiple Porosities Available for Various Viscosities

SHORT ORIFICE PISTON TYPE

Max. PSI	NPT	Length (in.)	Material	Part #
5,000	1/4"	1.5"	Brass	PXS-022B
15,000			Monel	PXS-022M
			303SS	PXS-022S
			316SS	PXS-022SS
5,000	1/2"	2"	Brass	PXS-023B
15,000			Monel	PXS-023M
			303SS	PXS-023S
			316SS	PXS-023SS

- A Moving Piston Design for Self-cleaning Action
- A Solid Body for High Pressure Resistance
- Three Pistons Included for Adjustable Snubbing

LONG ORIFICE PISTON TYPE

Max. PSI	NPT	Length (in.)	Material	Part #
3,000	1/4"	3.46"	Brass	PXS-010B
			303SS	PXS-010S
5,000			316SS	PXS-010SS
5,000	1/2"	2"	Brass	PXS-060B
			303SS	PXS-060S
10,000			316SS	PXS-060SS

- A Long Orifice for Smoother Snubbing
- A Moving Piston Design for Self-cleaning Action
- Three Pistons Included for Adjustable Snubbing
- Center Joint (1/4" and brass models) for Easier Adjustment

SIPHONS

Pigtail siphons are used in steam service to protect the instrument from direct exposure to high temperature steam.

COMMON SIPHON PART NUMBERS

					
NPT	Material	Schedule	180°	90°	360°
1/4"	Steel	40	PXS21SS	PXS22SS	PXS24SS

DIAL INDICATING THERMOMETERS

As one of the most experienced US manufacturers of temperature measurement products, REOTEMP has a broad product offering of high-quality dial indicating thermometers. REOTEMP offers rigid mount bimetallic thermometers, surface mount thermometers, remote reading thermometers, digital thermometers, and many other temperature indicating products for the industrial markets. Recognized for building durable, reliable products at industry leading lead times, you can count on REOTEMP to solve your temperature measurement needs.

BACK CONNECT BIMETAL THERMOMETER

REOTEMP's Bimetal Thermometers are reliable and accurate temperature sensors requiring no electricity or wiring. Back Connect Thermometers are ideal for local, eye-level temperature readings in most process applications. They can be recalibrated with a turn of the calibration screw on the back of the dial. A variety of options are available for your specific process needs.

FEATURES / BENEFITS

- Heavy-Duty Process Grade Design
- Five Year Warranty
- Made in the USA 
- Accuracy $\pm 1\%$ Full Scale (ASME B40.3 Grade A)
- Hermetically Sealed (ASME B40.3)
- Standard External Reset for Calibration
- Silicone Fillable for Vibration

SPECIFICATIONS

Accuracy	$\pm 1\%$ Full Scale (ASME B40.3)
Dial Size	3", 4" or 5"
Dial Material	Black marks on satin matte aluminum finish, Hi-Vis™, or white dial
Stem Length	2" to 80"
Stem Diameter	1/4" (Standard), 3/8" or 5/16"
Head, Bezel, Mounting Bushing, Stems	300 Series SS, 316SS (Optional)
Operating Conditions	Head temperature should not exceed 200°F (150°F if silicone filled). Stem should not be exposed to continuous temperatures exceeding 50% over-range or 800°F (550°F if silicone filled).
Environmental Protection	IP67, NEMA 6 Rated (Hermetically sealed per ASME B40.3)
Lens	Glass (Standard), Acrylic, Polycarbonate, Laminated Safety Glass or Tempered Glass
Immersion	Minimum 2" in liquid, and 4" in gas for most ranges. Certain ranges require up to 4" in liquids & 5" in gas.
Mounting Connection	1/2" NPT (Standard), 1/4" NPT, 3/4" NPT, Plain Hex Bushing, or 1/2" BSPT
Temperature Sensing Area	Last 2" to 4" of the stem

Note: Thermowells should be used whenever the stem or bulb would be exposed to pressure, corrosion, velocity, abrasion or shear forces. Thermowells also make it possible to remove the thermometer without losing pressure or the contents of the process.

ADJUSTABLE ANGLE BIMETAL THERMOMETER

REOTEMP's Bimetal Thermometers are reliable and accurate temperature sensors requiring no electricity or wiring. Adjustable Angle Thermometers allow for easy temperature monitoring from any position and they are ideal for local indication. They can be recalibrated with a turn of the calibration screw on the back of the dial.

Tags and Accessories

-TS = Tag, Stainless

-TP = Tag, Paper

-AS = Adapts Bimet to 1-1/4-18 industrial socket

-HT = Heat Transfer Compound

Mounting Orientation

-99 = 9 O'Clock Stem (Left Side)

-33 = 3 O'Clock Stem (Right Side)

-12 = 12 O'Clock Stem (Upside Down)

For Additional Options See Page 139

For Thermowells See Pages 160-166

Note: Thermowells should be used whenever the stem or bulb would be exposed to pressure, corrosion, velocity, abrasion or shear forces. Thermowells also make it possible to remove the thermometer without losing pressure or the contents of the process.

SANITARY BIMETAL THERMOMETER

REOTEMP's Sanitary Bimetal Thermometers are specially designed for direct insertion into sanitary process applications when a standard thermowell is not specified or the process environment is not exposed to pressure. Sanitary thermometers are ideal for the food, beverage and pharmaceutical industries.

- Silicone Fillable for Vibration

SPECIFICATIONS

Accuracy	$\pm 1\%$ Full Scale (ASME B40.3)
Dial Size	3", 4" or 5"
Dial Material	Black marks on satin matte aluminum finish, Hi-Vis™, or white dial
Stem Length	2" to 80"
Stem Diameter	1/4" (Standard), or 3/8"
Head, Bezel, Mounting Bushing	300 Series SS, or 316SS (Optional)
Stem & Tri-Clamp	316SS
Operating Conditions	Head temperature should not exceed 200°F (150°F if silicone filled). Stem should not be exposed to continuous temperatures exceeding 50% over-range or 800°F (550°F if silicone filled).
Environmental Protection	IP67, NEMA 6 Rated (Hermetically sealed per ASME B40.3)
Lens	Polycarbonate(Standard), Glass, Acrylic, Laminated Safety Glass or Tempered Glass
Immersion	Minimum 2" in liquid, and 4" in gas for most ranges. Certain ranges require up to 4" in liquids & 5" in gas.
Mounting Connection	Sanitary Tri-Clamp®
Temperature Sensing Area	Last 2" to 4" of the stem

DUAL MODE THERMOMETER

REOTEMP's Dual Mode Thermometer (DMT) is a convenient, multi-purpose indicator for local and remote temperature monitoring. This rugged dual-sensor system puts TWO independent sensors in ONE THERMOWELL, and allows easy tie-in to process controls. Both sensors are NIST traceable. Special sensor encapsulation and optional liquid filling make the DMT the most rugged, durable instrument of its kind.

Accuracy

Custom Logo

Made in the USA

FEATURES / BENEFITS

- Increase Reliability with Independent Local and Remote Reading (Up to 1000°F) from One Thermowell
- Redundant Sensors for Simple, Effective Calibration or Spot Checking Without Removing the Instrument from the Thermowell
- Interchangeable with Existing Thermometer, RTD, or Thermocouple

SPECIFICATIONS

Case & Bezel	304SS (Standard), 316SS
Case Style	Back or Adjustable Angle Connection
Dial Size	3", 4", or 5"
Process Connections	1/2" NPT (Standard) or 1/2" NPT Union
External Reset	Slotted Hex Screw
Lens	Glass (Standard), Plastic or Tempered Glass
Hermetic Seal	Bimetal Thermometer per ASME B40.3 (3/8" Stem Only)
Stem Material	304SS (Standard) or 316SS (Optional)
Stem Diameter	3/8" or 1/4"
Stem Length	2-1/2" to 36"
Bimetal Ranges	Standard Ranges and Divisions up to 800°F (538°C), See Page 141 for Complete Range Code Guide
Bimetal Over-range	50% Over Range to 550°F, 1000°F Max
Bimetal Accuracy	± 1% of Full Scale
TC/RTD Temperature Limits	-100°F to 1000°F (Thermocouple), -100°F to 600°F (RTD - DM4 Model), -100°F to 900°F (RTD - DMT Model)
Thermocouple	Type K Grounded Junction (Standard), Types T, E, J, and Ungrounded
Thermocouple Accuracy	Type K ± 2.2°C or 0.75% (-200°C to 1260°C), Whichever is Greater, Others Available Upon Request
RTD	Pt/385/Class B 100Ω (Std.), Others Available
RTD Accuracy	0.12%°C (Standard), Others Available
Head Orientation	RTD or Thermocouple Head is Mounted to the Right of the Bimetal Thermometer
Thermowell	Model DMT Fits Any Standard 0.385" Bore Thermowell or Model DM4 Fits 0.260" Bore

Bimetal Thermometer

- Local Easy-to-Read Temperature Indication
- Self-Actuating, Dampened Bimetal Helix Sensor
- Hermetically sealed per ASME B40.3 (3/8" stem only)

Thermocouple or RTD

- Remote Indication & Data Acquisition for Process Control
- Choice of Connection Styles
- 4-20mA Transmitter Output Available

NAVY TYPE DUAL MODE THERMOMETER

REOTEMP's Navy Type Dual Mode Thermometer combines a bimetal thermometer and RTD sensor into the same stem. This provides local indication and remote reading from a single instrument. The unit has a heavy duty, all-welded construction built to withstand tough shock and high vibration environments. The DMS option meets the requirements for MIL-S-901D and MIL-STD-167-1A for navy mil-spec shock and vibration.

Made in the USA

FEATURES / BENEFITS

- An Improved Dual Element Alternative to Standard MIL-I-17244E Bimetal Thermometer
- Reinforced Construction Designed for Use on Navy Ships and Other Demanding Applications
- Independent Local and Remote Reading (Up to 1000°F) from One Thermowell
- Redundant Sensors for Simple, Effective Calibration or Spot Checking Without Removing the Instrument from the Thermowell
- Interchangeable with Existing Thermometer, RTD, or Thermocouple
- DMS Model is Navy Mil-Spec Approved (MIL-S-901D & MIL-STD-167-1A)

SPECIFICATIONS

Approvals (Optional)	MIL-S 901D (Shock) and MIL-STD-167 (Vibration)
Sensor	100Ω Platinum 3 WireRTD
RTD Temperature Range	-40°F to 1000°F
Accuracy	RTD: Class B Bimetal: ± 1% of Scale
Electrical Connection	Mil Connector MS3451W10SL-3P 3 Pin Electrical Cable Connection
Dial Range	All Standard Bimetal Ranges. See page 141 for a Complete Range Code Guide
Dial Size	3" or 5"
Process Connections	3/4"-28 Thread, 1/2" NPT, or 7/8" 14 with Fixed Swivel Union and Navy Collar
Stem Diameter	3/8" DMN & DMS Models, 1/4" for DMC
Lens	Polycarbonate
Stem Material	304SS
External Dial Reset	Slotted Hex Screw

HEAVY-DUTY NAVY TYPE BIMETAL THERMOMETER

REOTEMP's Bimetal Thermometers are reliable and durable temperature sensors. Navy Type Thermometers are specifically designed to resist vibration and shock. They are ideal for local indication, requiring no electricity or wiring. They can be recalibrated with a turn of the calibration screw on the back of the dial.

Accuracy

Custom Logo

FEATURES / BENEFITS

- Heavy-Duty Vibration and Shock Resistant
- Made in the USA
- Accuracy $\pm 1\%$ Full Scale. (ASME B40.3)
- 3" Dial with Bimetal Actuation
- Hermetically Sealed (ASME B40.3)
- Plastic Crystal Polycarbonate Window
- Standard External Reset
- Fits in 5" Scale "Submarine" Thermowell
- The standard 3/4"- 28 UN2A Union Connection is designed for Navy thermowells
- Silicone Fillable for Vibration

SPECIFICATIONS

Accuracy	$\pm 1\%$ Full Scale (ASME B40.3)
Dial Size	3"
Dial Material	Black marks on satin matte aluminum finish, or White Dial
Stem Length	2", 4", and 6" (Standard); custom lengths available.
Stem Diameter	.375" (Standard) or 1/4"
Head, Bezel, Mounting Bushing, Stems	300 Series SS
Operating Conditions	Head temperature should not exceed 200°F (150°F if silicone filled). Stem should not be exposed to continuous temperatures exceeding 50% over-range or 800°F (550°F if silicone filled).
Environmental Protection	IP67, NEMA 6 Rated (Hermetically sealed per ASME B40.3)
Lens	Plastic
Immersion	Minimum 2" in liquid, and 4" in gas.
Mounting Connection	3/4"- 28 UN2A Union Connection (to be used in thermowell)
Temperature Sensing Area	Last 2" to 4" of the stem.

Ambient Temperature Range	32°F to 122°F (0°C to 50°C)
Housing Material	Stainless Steel 316
Lens	Plastic Polycarbonate (Standard) or Glass
Probe Material	304 Stainless Steel
Weight	12 oz., Varies by Configuration
Environmental Protection	NEMA 4X/IP67
Power	1 x 3.6V AA Battery (M12 is loop powered 9-36 VDC.)
Battery Life	5 Years Minimum in Continuous Mode
Electronic Display Temperature Limit	If the temperature of the electronics in the display housing exceeds 122°F (50°C), permanent damage to the display will occur. A remote mount is recommended for high or low temperature applications.

EH Head Approvals: FM Approved Enclosure Only: CL. I. GR. A,B,C,D; CL. II. GR E,F,G; CL. III.; Type 4X. For CSA Class I, Group A, conduit seal is required within 18 inches. CL. I, ZONE 1, ATEX: d IIC, IP66. ATEX: II 2GD Ex d tD A21 IIC, FTZU 04 ATEX 0265U. IECEx FMG 06.0003U, Ex d II C, IP68.

EH Explosion Proof Head

ADJUSTABLE ANGLE DIGITAL THERMOMETER/TRANSMITTER

REOTEMP's Adjustable Angle Digital Thermometer/Transmitter is a high accuracy thermometer with digital display. It features an IP67/NEMA 4X enclosure and a 5 year battery life. The Digital Thermometer is perfect for a variety of markets and applications where a high accuracy digital readout is required.

SANITARY DIGITAL THERMOMETER/TRANSMITTER

REOTEMP's Sanitary Digital Thermometer/Transmitter is a high accuracy thermometer with digital display. It features an IP67/NEMA 4X enclosure, clean-in-place connection, and a 5 year battery life. The Digital Thermometer is perfect for brewing, food, beverage and pharmaceutical applications where a high accuracy digital readout is required.

Accuracy

Custom Logo

Made in the USA

FEATURES / BENEFITS

- 3-A Conformance Certificate Included
- High Accuracy 1,000Ω RTD (Class A)
- Water Resistant IP67/NEMA 4X
- 5 Year Battery Life
- 4-20 mA Output Available
- Low or High Temperature Range Models

SPECIFICATIONS

Accuracy $\pm (0.72 + 0.002 \times |t - 32|)$ °F,
 $\pm (0.42 + 0.002 \times |t|)$ °C, where
t = temperature. Example: At 32°F
accuracy is ± 0.72 °F.

Sensing Element RTD, Type Pt1000Ω, Class A

Temperature Ranges -58°F to 392°F (-50°C to 200°C) or
-328°F to 1112°F (-200°C to 600°C)

Output (Optional) 4-20 mA, M12 Connector

Refresh Rate 3 Seconds

Display 4-digit LCD, 1/2" Height

Display Resolution See Table 1

RFI Effect 1% or Less Typical

Temperature Effect 32°F to 122°F (0°C to 50°C)

Storage Temperature Range -4°F to 158°F (-20°C to 70°C)

Housing Material Stainless Steel 316

Wetted Finish Ra 32 max., Ra 20 max. (optional)

Lens Plastic Polycarbonate (Standard) or Glass

Probe Material 304 Stainless Steel

Weight 12 oz., Varies by Configuration

Environmental Protection NEMA 4X/IP67

Power 1 x 3.6V AA Battery (M12 is loop powered 9-36 VDC.)

Battery Life 5 Years Minimum in Continuous Mode

Electronic Display Temperature Limit If the temperature of the electronics in the display housing exceeds 122°F (50°C), permanent damage to the display will occur. A remote mount is recommended for high temperature applications.

HANDHELD DIGITAL THERMOMETER

REOTEMP's Handheld Digital Thermometer is a multi-purpose high accuracy thermometer used to spot check various process media commonly found in the brewing and food & beverage industries. The Digital Handheld Thermometer features rugged all stainless steel construction and a built-in handle for ease of handling and extra protection.

REOTEMP's Hi-Vis™ dial increases the visibility of dials in low-light environments and from a distance. Hi-Vis™ dials are often used in areas where readings are paramount to safety. They can also be used to differentiate between two different process lines within a facility.

-HV Hi-Vis™ High Visibility Dial

Availability Process Grade Thermometers

Hi-Vis™

COLOR BANDS & COLOR PIES

Color bands and pies highlight a specific range on the gauge so that it is immediately apparent if the process falls within a critical temperature range.

-CB Color Band (Specify Colors and Ranges)

-CP Color Pie (Specify Colors and Ranges)

Availability Process Grade Thermometers

Color Band

Color Pie

CUSTOM LOGO DIAL

Thermometer dials offer a unique opportunity to communicate critical information, highlight installation specifications, or promote an OEM or end-user brand.

-CL Custom Logo Dial

Availability All Dial Indicating Thermometers.

Custom Logo

DIAL MARKING

Add text, a serial number, tag number, equipment class, or other text to the thermometer dial face.

-DM Dial Marking

Availability All Dial Indicating Thermometers.

Min-Max Pointer with Color Bands

† For 2.5" stem, all bottom connect and all-angle models require adapter P/N AD22S.

SURFACE THERMOMETER

The REOTEMP Surface Bimetal Thermometer measures temperature on any horizontal surface. The magnetic feet on this model snap it securely to any ferrous surface. It is commonly used on griddles, ovens, motors, piping and tanks.

SPECIFICATIONS

Accuracy	± 2% Full Scale
Sensing Element	Precision Calibrated Bimetal Coil
Dial Size	2" (5.08cm)
Dial Material	Aluminum background with black marks.
Case	Aluminum
Lens	Glass
Height	1/2" (1.27cm)
Weight	Approximately 2 ounces (56.7g)
Response Time	Approximately 1 minute.
Mounting	Two magnets on back.

TEMPERATURE
RANGE

SUR-15 = 0 to 150°F & -20 to 65°C
SUR-25 = 0 to 250°F & -20 to 120°C
SUR-50 = 0 to 500°F & -20 to 260°C
SUR-75 = 50 to 750°F & 10 to 400°C

— **SUR-15**

HOW TO ORDER

POCKET BIMETAL THERMOMETER

FEATURES / BENEFITS

- Accurate and Rugged
- Quick Response
- Shock Resistant
- Sensitive Bimetal Element
- External Reset Adjustment
- Waterproof and Dust Proof
- Stainless Steel or Plastic Pocket Case

SPECIFICATIONS

Accuracy	± 2% Full Scale
Dial Size	1" Diameter (25mm)
Dial Material	White background with crisp letters, marks, and numbers.
Stem Length	142 O.D., 5" long, pointed (36mm x 127mm)
Pocket Case	Plastic with clip and holder loop.
Lens	Glass
Reset Nut	7/16 Hex (11mm)
Weight	0.65 Ounces (18.5g)
Packed	1 per box, 12 per carton

TEMPERATURE
RANGE

Fahrenheit Ranges
K-79-2 = -40°F to 160°F
K-79-3 = 0°F to 220°F
K-79-4 = 25°F to 125°F
K-79-5 = 50°F to 550°F

Celsius Ranges
K-79-7 = -10°C to 110°C
K-79-8 = 0°C to 150°C
K-79-9 = 0°C to 250°C

— **K-79-2**

HOW TO ORDER

O-TEMP™ BIMETAL THERMOMETERS

REOTEMP's O-TEMP Bimetal Thermometers are reliable and accurate temperature sensors requiring no electricity or wiring. The O-TEMP line is designed for OEM applications in a variety of industrial applications where a more economical option is needed. They can be recalibrated with a turn of the calibration screw on the back of the dial. A variety of options are available for your specific process needs.

O-TEMP™
Quality OEM Thermometers

Note: Thermowells should be used whenever the stem or bulb would be exposed to pressure, corrosion, velocity, abrasion or shear forces. Thermowells also make it possible to remove the thermometer without losing pressure or the contents of the process.

REMOTE DIGITAL THERMOMETER/TRANSMITTER

REOTEMP's Remote Digital Thermometer/Transmitter is a high accuracy thermometer with digital display. It features an IP67/ NEMA 4X enclosure and a 5 year battery life. The Remote Digital is perfect for a variety of markets and applications where a high accuracy digital readout is required.

Accuracy

Custom Logo

Made in the USA

FEATURES / BENEFITS

- High Accuracy 1,000Ω RTD (Class A)
- Water Resistant IP67/NEMA 4X
- 5 Year Battery Life
- 4-20 mA Output Available
- Low or High Temperature Range Models

SPECIFICATIONS

Accuracy $\pm (0.72 + 0.002 \times |t - 32|)$ °F,
 $\pm (0.42 + 0.002 \times |t|)$ °C, where
 t = temperature. Example: At 32°F
 accuracy is ± 0.72 °F.

Sensing Element RTD, Type Pt1000Ω, Class A

Temperature Ranges -58°F to 392°F (-50°C to 200°C) or
 -328°F to 1112°F (-200°C to 600°C)

Output (Optional) 4-20 mA, M12 Connector

Refresh Rate 3 Seconds

Display 4-digit LCD, 1/2" Height

Display Resolution See Table 1

RFI Effect 1% or Less Typical

Ambient Temperature Range 32°F to 122°F (0°C to 50°C)

Housing Material Stainless Steel 316

Lens Plastic Polycarbonate (Standard) or Glass

Probe Material 304 Stainless Steel

Weight 12 oz., Varies by Configuration

Environmental Protection NEMA 4X/IP67

Power 1 x 3.6V AA Battery (M12 is loop powered 9-36 VDC.)

Battery Life 5 Years Minimum in Continuous Mode

Electronic Display Temperature Limit If the temperature of the electronics in the display housing exceeds 122°F (50°C), permanent damage to the display will occur. A remote mount is recommended for high or low temperature applications.

Table 1: Display Resolution

Model	Range	Decimal Point
Low Temp, Displays Decimal	-58°F to 392°F (-50°C to 200°C)	Yes
High Temp, No Decimal	-328°F to 1112°F (-200°C to 600°C)	No

VAPOR ACTUATED THERMOMETER

REOTEMP's Vapor Actuated Thermometers can be fitted into a large variety of temperature indicating applications. Manufactured to the highest standards, these instruments are ideal for remote reading. Vapor actuated thermometers, are not subject to indicator error due to ambient temperature variations along the capillary tube system, and will give excellent readings provided the measured temperature is above or below ambient temperature.

Note: Vapor instruments have progressive non-linear graduations, and are best read in the upper 2/3 of the dial range. Many ranges are available between -40°F and +350°F, and care should be exercised to select a range that will locate the operating temperatures within the upper 2/3 of the dial range.

Custom Logo

Made in the USA

FEATURES / BENEFITS

- Accuracy ± 1 Scale Division (Upper 2/3 Scale)
- Ideal for Remote Reading, such as Panel Installation
- Capillary Lengths of 1 to 100 Feet
- Stainless Steel Sealed Construction
- Variety of Flanged or U-Clamp Mounting Options
- Brass and 316SS Thermowells for Vapor-Actuated Bulbs Available.

SPECIFICATIONS

Accuracy	± 1 Scale Division (Upper 2/3 Scale)
Dial Size	2", 2 1/2", 3 1/2", 4 1/2"
Ranges	Over twenty °F and °F/°C ranges available, from -40°F to 350°F. For higher temperature ranges, please call REOTEMP to inquire about gas-actuated vapor thermometers.
Case Material	All-Stainless Steel, except: VA45FL (Aluminum) and VA45TB (Phenolic)
Bulbs	Stainless Steel or Copper. Bulb O.D. 7/16" (threaded), 3/8" (plain). Bulb lengths vary from 2 1/2" to 9 1/4" depending on capillary length.
Pointer	Standard Adjustable
Lens	Polycarbonate or Glass
Process Connection	Plain Bulb, 1/2" NPT Union, 1/2" NPT sliding union on 12" bendable extension, or thermowell.
Bourdon Tube	Phosphor Bronze
Movement	Brass with Precision Gearing
Dial Material	Aluminum with white finish and black markings. Other colors available upon request.
Capillary	Copper, copper with bronze braid armor, stainless steel, stainless steel with stainless steel armor. Available lengths from 1-100ft.
Applications	Control panels, chemical processing, pipelines, food processing, OEM applications, ovens, solar heating, refrigeration, etc.

Note: Thermowells should be used whenever the stem or bulb would be exposed to pressure, corrosion, velocity, abrasion or shear forces. Thermowells also make it possible to remove the thermometer without losing pressure or the contents of the process.

GAS ACTUATED THERMOMETER

REOTEMP's Gas Actuated Thermometers combine advanced gas coil technology with a state-of-the-art adsorbent-(Class IV) thermal system, producing a superior temperature measurement instrument that can be fitted to a wide variety of applications. Features include high accuracy, low ambient error, no head error, and a high degree of over-range protection. The compact (3/8" diameter x 3" active length) bulb, and a wide range of case styles and thermal systems, allow great flexibility in installation. The linear dial on all REOTEMP gas thermometers provides a consistent 1% accuracy across the full span of each range. This, combined with over twenty Fahrenheit and dual ranges, from -320°F to +1200°F, provides complete coverage of all normal temperature requirements.

Looking for Smaller Sized Dials? Call REOTEMP customer service to inquire about gas-actuated vapor thermometers.

Note: Thermowells should be used whenever the stem or bulb would be exposed to pressure, corrosion, velocity, abrasion or shear forces. Thermowells also make it possible to remove the thermometer without losing pressure or the contents of the process.

Accuracy

Custom Logo

Made in the USA

FEATURES / BENEFITS

- Accuracy $\pm 1\%$ Full Scale
- Can Handle a Wide Temperature Range Up to 1200°F
- Wide Variety of Wall, Panel and Direct Mounting Options
- Capillary Lengths Up to 99 Feet
- OEM Logo Dials/Custom Dials
- One Year Warranty

SPECIFICATIONS

Accuracy	$\pm 1\%$ Full Scale, Calibration to NIST Traceable Standards
Ranges	°F, °C, and Dual Scale Ranges Available from -320°F to 1200°F (-200°C to 650°C)
Overrange	Minimum 10% of span above top of range, or 1300°F (704°C), whichever is less.
Ambient Error	1/4% of Span per 25°F Change in Ambient Temperature at Midscale
Dial Size	4-1/2" & 6" Dials, White with Black Markings
Case Material	Stainless Steel, Polypropylene, or Aluminum
Case Styles	Panel Mount, Surface Mount, or Direct (stem) Mount
Bulbs	316SS, 3/8" Diameter x 3" Active Length, Other Diameters and Lengths are Available
Thermal Systems	Stainless steel capillary with stainless steel spring armor (up to 40ft). Over 40 feet, stainless steel interlock armor is standard. Direct mount stems, 316 SS, 4" to 48".
Pointer	Aluminum, Slotted Adjustable Type to Permit Zero-Set Adjustments
Lens	Glass (Standard), Safety Glass and Acrylic Options Available. Aluminum style is available with glass only.
Immersion	Minimum 2" in liquid, and 4" in gas for most ranges. Certain ranges require up to 4" in liquids & 5" in gas.
Process Connection	Plain Bulb, 1/2" NPT Union, 1/2" NPT sliding union on 12" bendable extension, or thermowell. Note: Thermowells must be used whenever the bulb would be exposed to pressure, fluid velocity, or corrosive media.

LIQUID-IN-GLASS THERMOMETER

REOTEMP's Liquid-In-Glass Industrial Thermometers are used in pipelines of all types, commercial building application (heating & cooling), process piping, tanks, boilers, etc.

Accuracy

Made in the USA

FEATURES / BENEFITS

- Made to ASME B40.3 Specifications
- Accuracy $\pm 1\%$ Full Scale. (ASME B40.3)
- One Year Warranty

SPECIFICATIONS

Accuracy: $\pm 1\%$ Full Scale. (ASME B40.3)

Case: Modern V-shape design with parts molded of polyester, in black textured finish. Heavy glass protected front firmly secured by spring action.

Stem: Tapered bulb chambers are made of precision ground aluminum. The tapered chamber forms a metal contact with matching taper in the sockets assuring maximum speed of response to temperature changes. Graphite is used as a conducting media between bulb chamber and glass tube.

Locking Device: Adjustable case locknut and angle adjusting screw work independently to provide full 360° positioning of thermometer case and stem.

Tube & Capillary: Blue Spirit filled magnifying lens tube. Precision made to guarantee accuracy within 1% of scale range. Silicone shock mounting for lasting durability.

Scale: 9" scale with white coated aluminum and permanently baked bold black markings.

HOW TO ORDER: Choose options to build a part number. For example: **9VS35016SOC35B**

9VS35

016

SOC35B

Note: Thermowells should be used whenever the stem or bulb would be exposed to pressure, corrosion, velocity, abrasion or shear forces. Thermowells also make it possible to remove the thermometer without losing pressure or the contents of the process.

STEM

TEMPERATURE RANGE

THERMOWELL

9VS35 = 3 1/2"
9VS06 = 6"
9VS09 = 9"

THERMOWELLS

REOTEMP Thermowells are manufactured to the highest quality and precision, ensuring a durable product for even the most severe applications. Whether it is a custom design or a common configuration, REOTEMP responds quickly to exceed customer requirements.

THREADED THERMOWELLS

REOTEMP Threaded Thermowells make it possible to remove an instrument without dropping pressure or losing contents of the process. Thermowells also protect the instrument from getting bent by the process media. Threaded thermowells are perfect for applications that require infrequent replacement and are commonly installed on smaller pipes or vessels. They are best suited for non-corrosive media. REOTEMP threaded thermowells are machined from solid bar stock.

Threaded

FEATURES / BENEFITS

- Machined from Solid Material
- Protects Your Instrument from the Process
- Easy Removal of Instrument for Calibration or Replacement

OPTIONS

- Wake Frequency Calculation
- Hydrostatic Test
- NACE Certified
- Material Certificate
- Special Marking (Stamping)
- Plug & Chain
- PMI

WELDED THERMOWELLS

REOTEMP Welded Thermowells make it possible to remove an instrument without dropping pressure or losing the contents of the process. Thermowells also protect the instrument from getting bent by the process media. Weld-in thermowells are welded directly to a pipe or tank, providing a very high quality connection. Because they are welded, they should only be used when access is not required and corrosion is not an issue. Common installations include high temperature and high pressure applications with non-corrosive media. REOTEMP weld-in thermowells are machined from bar stock.

**Socket
Weld**

FEATURES / BENEFITS

FLANGED THERMOWELLS

REOTEMP's Flanged Thermowells make it possible to remove an instrument without dropping pressure or losing contents of the process. Thermowells also protect the instrument from getting bent by the process media. Flanged thermowells are the preferred well for applications that require frequent removal or replacement due to corrosion or other hazards. Flanged wells bolt to a mating flange that is installed on the process piping. Common installations include large pipes with high pressure and high corrosion.

FEATURES / BENEFITS

- Die Stamped with Material
- Ideal for High Pressure and High Corrosion Applications Requiring Frequent Replacement
- Easy Removal of Instrument for Calibration or Replacement

SANITARY THERMOWELLS

REOTEMP's Sanitary Thermowells make it possible to remove an instrument without dropping pressure or losing contents. Each stainless steel Thermowell is die stamped with type of material from which it is made. Sanitary wells have a smooth surface (RA32 or Better) and a Tri-Clamp® connection which allows for easy cleaning to prevent contamination of the process. They are used in the Dairy, Food Processing and Pharmaceutical industries.

FEATURES / BENEFITS

- Smooth Surface for Easy Cleaning (RA32 or Better)
- Provides Sanitary Protection for Temperature Probes
- All 316L Stainless Steel Construction
- Fast Installation and Removal
- Ideal for Food, Beverage, Biotech, and Pharmaceutical Applications
- Exceeds 3A #4 Finish
- Easy Removal of Instrument for Calibration or Replacement

WARRANTY & EVALUATION POLICY

REOTEMP warrants all pressure and temperature measurement products against defective workmanship or materials under normal use and service for the following periods after the date of shipment.

FIVE YEAR WARRANTY

- Process Grade Bimetal Thermometers (3", 4", and 5" dial sizes)

THREE YEAR WARRANTY

- Industrial Pressure and Differential Pressure Gauges
- Valves and Manifolds

ONE YEAR WARRANTY

- Diaphragm Seals
- Pressure Transmitters and Switches
- OEM Bimetal Thermometers
- Digital Thermometers
- Remote Reading Thermometers
- Thermowells
- Accessories and Other Items

REOTEMP's liability is limited to repair or replacement at the factory, shipping charges prepaid. This warranty does not cover deterioration from normal wear and tear, exposure to corrosive materials, exposure to temperatures or pressures in excess of those recommended, excessive vibration, forces, or abrasion which cause deformation of component parts. This warranty is expressly in lieu of any other warranty, expressed or implied. REOTEMP shall not be liable for any defect or consequential damages arising out of any defects or from any cause whatsoever. Suitability of product for the customer's application rests with the customer; REOTEMP does not warrant suitability of its products for the application chosen by the customer.

REOTEMP will only accept shipments with returned product that are accompanied with a return authorization issued by REOTEMP. Please respect the health and safety of our employees by cleaning goods before return, disclosing any chemicals or foreign substance that may be on returned product and enclosing MSDS information. Handling and cleaning fees may apply.

REOTEMP reserves the right to make product improvements and change its specifications stated throughout the catalog at any time without notification. Please contact the factory on all critical dimensions and specifications for verification.

REOTEMP'S GUIDING PRINCIPLES

- > Provide industry leading customer satisfaction with a focus on fast turnaround, friendly service and keeping it easy to do business with REOTEMP. Make it Quick and Easy!
- > Focus on manufacturing quality instruments, continuous improvement and adding value to our product and services.
- > Build long-lasting and rewarding relationships with the people we do business with.
- > Maintain an enjoyable, fulfilling work environment for our employees.
- > Build a strong REOTEMP brand and reputation in the industrial markets where we compete.
- > Achieve planned, sustained growth in our target markets both in the US and internationally.
