Universal® 1 Series

ROTARY POSITIVE DISPLACEMENT PUMPS

› **Waukesha Cherry-Burrell®**

For more than half a century, Waukesha Cherry-Burrell® has been a leader in the design, manufacturing and application of external circumferential piston (ECP) style, rotary positive displacement pumps. Waukesha Cherry-Burrell PD pumps are in service around the world in food, dairy, canning, bakery, beverage and pharmaceutical processing, as well as difficult chemical and industrial applications.

Users of Waukesha Cherry-Burrell PD pumps benefit from decades of continuing product improvement. Steady advances in design, metallurgy and fabrication techniques have yielded progressively higher levels of performance and service life.

SPX FLOW, Inc. (NYSE:FLOW) is a leading manufacturer of innovative flow technologies, many of which help define the industry standard in the market segments they serve. From its headquarters in Charlotte, North Carolina, it operates a sales and support network, centers of manufacturing excellence, and advanced engineering facilities, throughout the world. Its cutting-edge flow components and process equipment portfolio includes a wide range of pumps, valves, heat exchangers, mixers, homogenizers, separators, filters, UHT, and drying technology that meet many application needs. Its expert engineering capability also makes it a premium supplier of customized solutions and complete, turn-key packages to meet the most exacting of installation demands.

Incorporating many leading brands, SPX FLOW has a long history of serving the food and beverage, power and energy, and industrial market sectors. Its designs and engineered solutions help customers drive efficiency and productivity, increase quality and reliability, and meet the latest regulatory demands. In-depth understanding of applications and processes, state-of-the-art Innovation Centers, and advanced pilot/ testing technology further assist in optimizing processes and reducing timescales to reliably meet production targets.

To learn more about SPX FLOW capabilities, its latest technology innovations and complete service offerings, please visit www.spxflow.com.

Setting the standard of performance for the sanitary industry for over 50 years.

PRODUCT FEATURES AND BENEFITS

Sanitation features

- 316L stainless steel body, cover, and shaft
- Easy disassembly for COP cleaning
- Elastomers that comply with FDA requirements
- Aseptic models available
- Meets 3-A sanitary standards

Long-life features

- Up to 200 psi (13.8 bar) pressure capability*
- No bearings in product zone
- Heavy duty bearing frame with large diameter shafts
- Grease lubed bearings for positive lubrication of all bearing over entire speed, temperature and pressure range
- Non-galling Waukesha "88" alloy rotors standard; permits running at tighter clearances and pumping a wide range of viscosities
- Remanufacturing and Inspect and Advise programs to extend life and reduce costs

Available options

*High strength 17-4 PH shafts and hex cover nuts for higher pressure applications

- Stainless steel gear case
- Stainless steel bearing retainers
- Bearing isolators protect bearings from contamination
- Body retaining screws
- Steel-It paint
- Single wing rotors for reduced damage of particulates.
- Jacketed or vented covers
- Rectangular flange inlet for high viscosity products
- Tru-Fit® close coupled pump design

Installation Features

- Bidirectional flow. Rotors, locked with double jam nuts, rotate securely in either direction.
- No flow direction/shaft position specifications
- Versatile 3-Way mounting of gear case, including vertical alignment of ports
- Upper or lower shaft position
- Easy to install or convert single o-ring to mechanical seals
- Interchangeable installation dimensions with Universal 2 and Universal Lobe PD pumps

Shown with optional stainless steel gearcase

ISO 9001
CERTIFIED

Typical product applications

Bakery

Batters
Flavorings
Frostings
Fruit Fillings
Fats & Oils
Sweeteners
Yeast Slurry

Beverage

Beer, Wort, Yeast
Soft Drinks
Juice
Fruit Concentrates
Fruit Drinks
Wine
High Fructose Corn Syrups (HFCS)

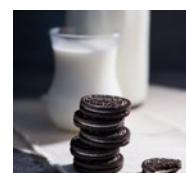

Canning

Baby Foods, Soups, Stews
Tomato Paste/Sauces
Fruit Puree
Vegetables, Diced, Slurries
Puddings, Jams, Jellies
Salad Dressings, Mayonnaise

Confectionery

Syrups
Cream Fillings
Chocolate

Cosmetics

Face Creams & Lotions
Hair Styling Gels & Liquids
Essential Oils
Dyes & Alcohols
Shampoos

Dairy

Cream, Milk, Butter
Cheese Curd & Whey
Cottage Cheese
Yogurt

Meat Packing

Meat-Emulsions
Ground Meats
Pet Foods
Ruffle & Caul Fat
Mechanically Deboned Meat (MDM)

Pharmaceutical/Health Care

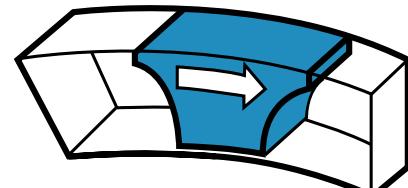

Pill Pastes
Syrups
Extracts
Emulsions
Slurries
Tooth Paste

Time-tested Waukesha Cherry-Burrell® rotary pump; external circumferential piston (ECP) operating principle.

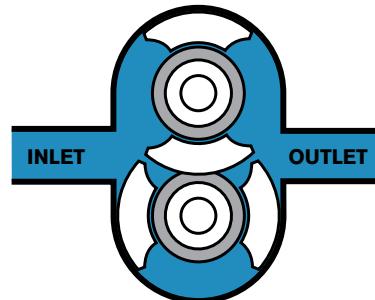

THEORY OF OPERATION

In the Waukesha Cherry-Burrell design, arc-shaped “pistons” (rotor wings) travel in annular-shaped cylinders machined in the pump body; the resulting long sealing path reduces slippage and produces a smooth flow of product without destructive pulses or pressure peaks and without valves or complex parts.

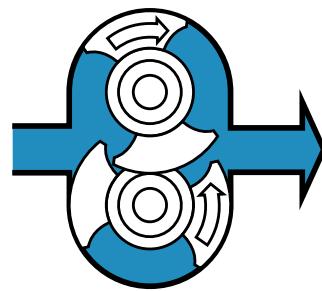

FOR LOW VISCOSITY FLUIDS

Rotors, made of Waukesha “88” alloy, can be run with close clearance to the 316L stainless steel fluid head, without galling or seizing should inadvertent pressure surges cause contact. The close clearances combined with the rotor geometry, which gives a long sealing path between the pump inlet and outlet, means low slip operation. As a result, you achieve: high volumetric efficiency, good priming ability, metering capability and good flow control.

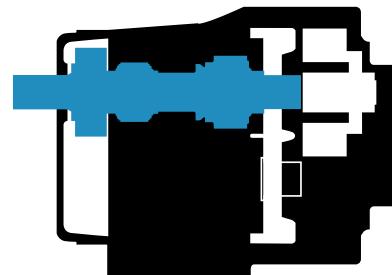

FOR HIGH VISCOSITY FLUIDS

The large fluid cavities of the rotors, plus the large easy entry anti-cavitation ports, allow efficient pumping of high viscosity fluids, slurries or even liquids with large chunks or particles.

FOR NON-LUBRICATING AND ABRASIVE FLUIDS

The unique Waukesha Cherry-Burrell design has no bearings in the fluid being pumped, no sliding or rolling contact and no rotor-to-rotor contact. This produces EXCELLENT SERVICE LIFE even under severe operating conditions.

PRODUCT SPECIFICATIONS

UNIVERSAL 1 MODELS

MODEL	DISPLACEMENT PER REVOLUTION	NOMINAL CAPACITY* TO	INLET/OUTLET	OPTIONAL INLET/OUTLET	PRESSURE RANGE UP TO**	MAXIMUM RPM	TEMP RANGE**

323	.616 GAL. (2.332 LITER)	360 gpm (81.8 m ³ /hr.)	6"	225 PSI (15.5 bar)	600	

*For capacities above 450 to 935 GPM (102 to 212 m³/hr), see bulletin FH-1725 on 420/520 UHC (ECP Rotors) and FH-1733 on 420/520 UHCL (Lobe Rotors).

**Contact application engineering for higher pressure or higher temperature applications.

Note: Universal 2 (Bulletin FH-1723) and Universal Lobe (Bulletin FH-1733) models are available for CIP installations, applications up to 500 psi (34 bar), and extended run services not needing frequent tear down for cleaning.

Std. Rotors:
-40°F (-40°C) to 180°F (82°F)

Hot Clearance Rotors:
-40°F (-40°C) to 300°F (149°C)

Std. Rotors:
-40°F (-40°C) to 180°F (82°F)

Hot Clearance Rotors:
-40°F (-40°C) to 300°F (149°C)

Time-Tested Waukesha Cherry-Burrell® Rotary Pump.

The Waukesha Cherry-Burrell Universal 1 Series gives you...

High pressure capability; up to 200 psi/13.8 bar*.

Long service life: High capacity components run long, reducing service stops.

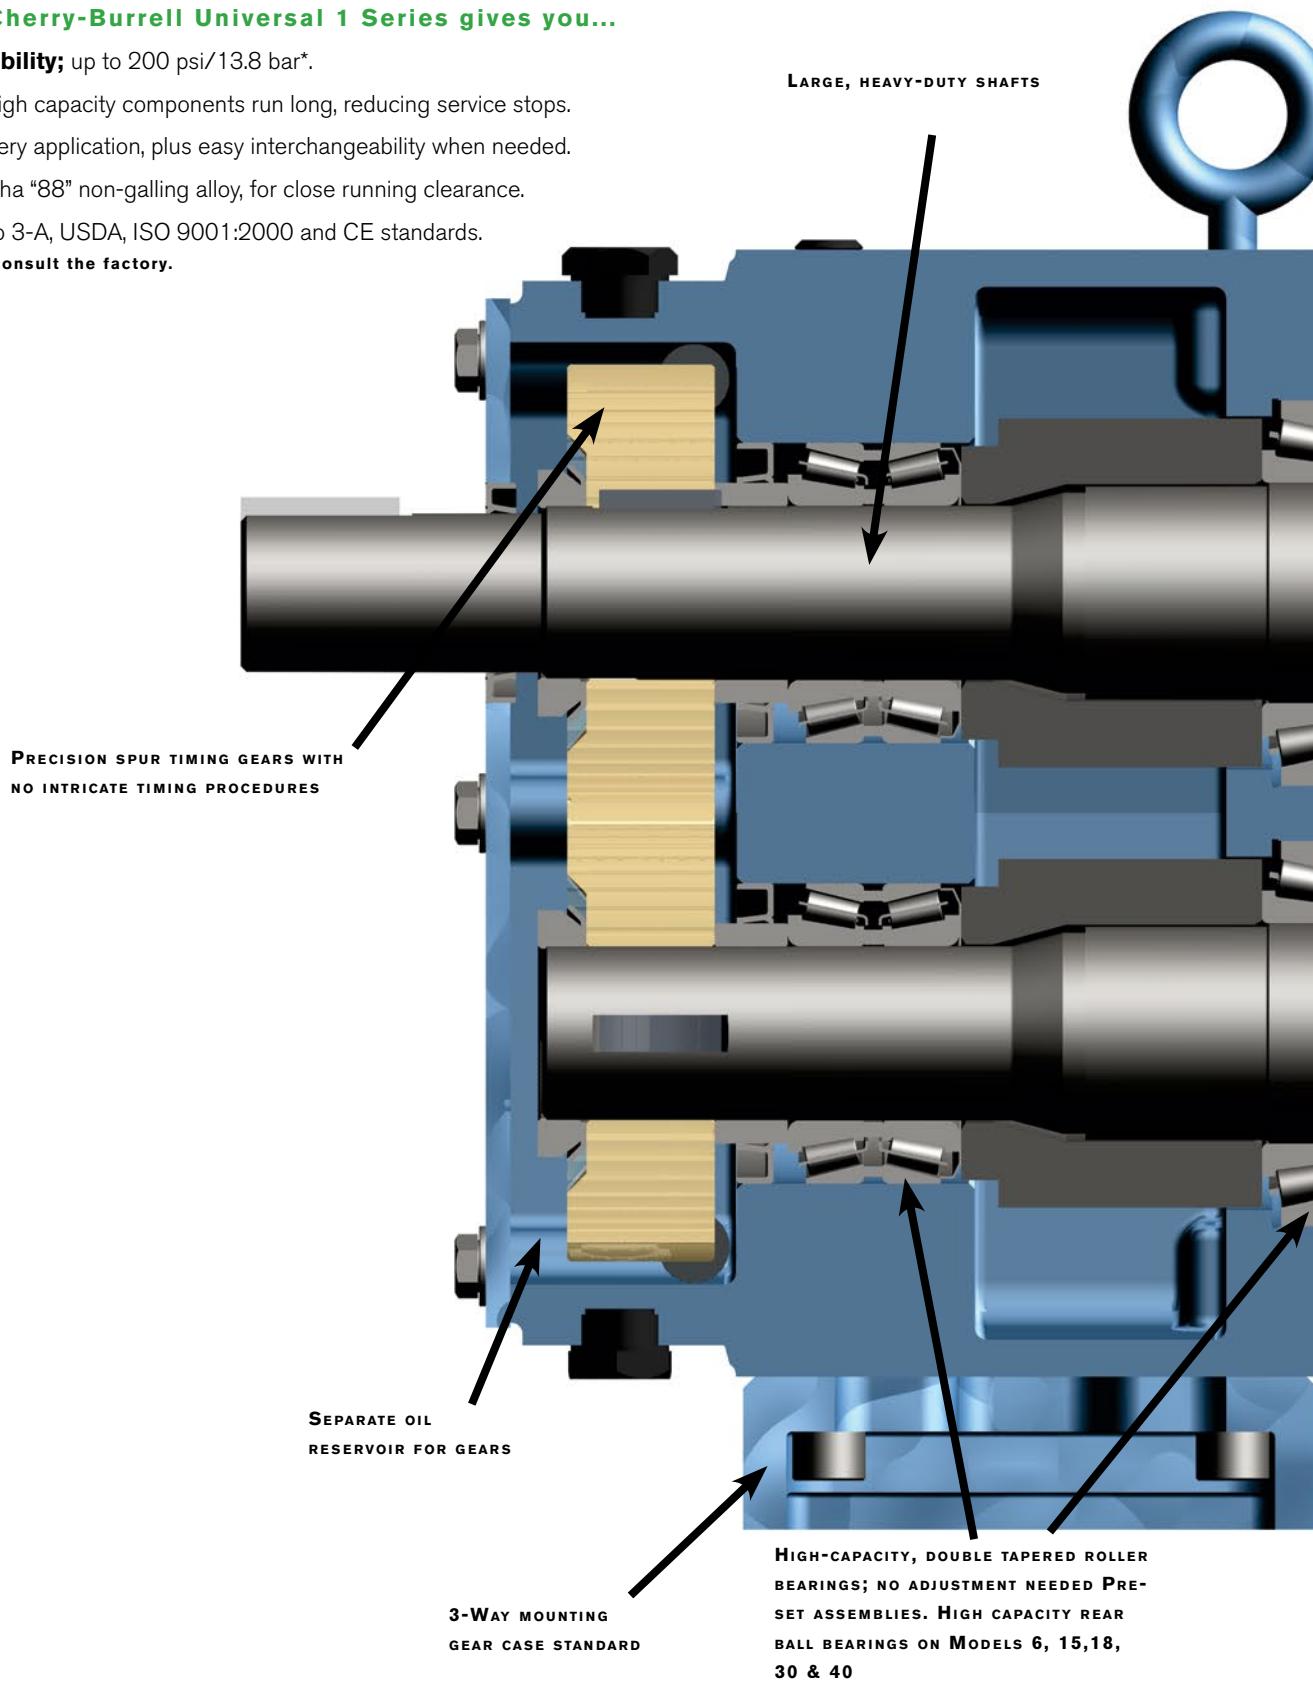

The right seal for every application, plus easy interchangeability when needed.

Metal rotor: Waukesha "88" non-galling alloy, for close running clearance.

Design conforms, to 3-A, USDA, ISO 9001:2000 and CE standards.

*For higher pressures, consult the factory.

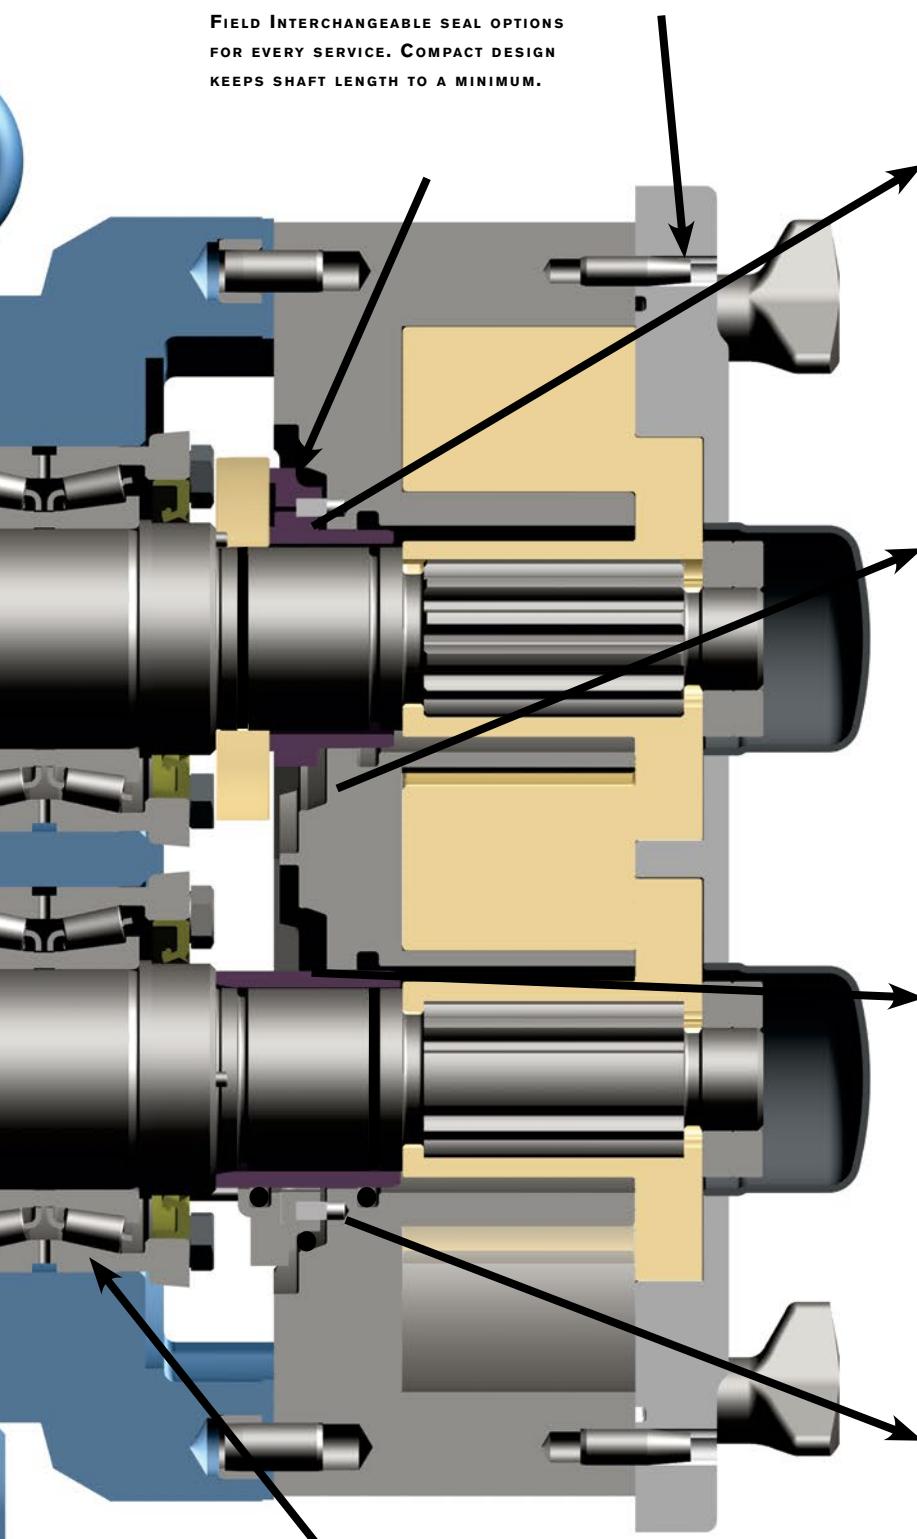

LARGE, HEAVY-DUTY SHAFTS

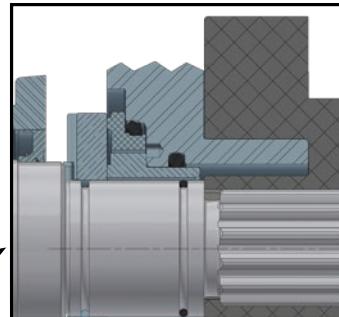

Seal Options

316L STAINLESS STEEL BODY AND
COVER; DESIGN CONFORMS TO USDA
STANDARDS

FIELD INTERCHANGEABLE SEAL OPTIONS
FOR EVERY SERVICE. COMPACT DESIGN
KEEPS SHAFT LENGTH TO A MINIMUM.

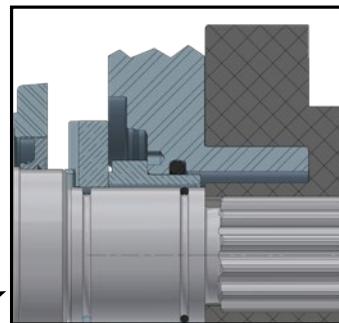

FRONT BEARING FIXED; REAR
BEARING FLOATING. BETTER
CONTROL OF THERMAL EXPANSION
WHEN HANDLING HOT PRODUCTS

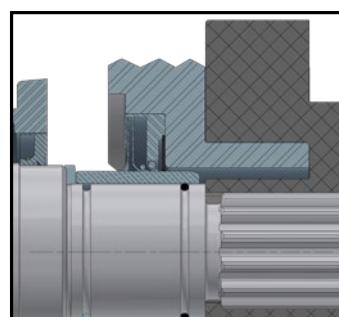

Double Concentric Mechanical Seal

Used with flushing fluid to cool, lubricate, flush away residue. Best arrangement for severe service.

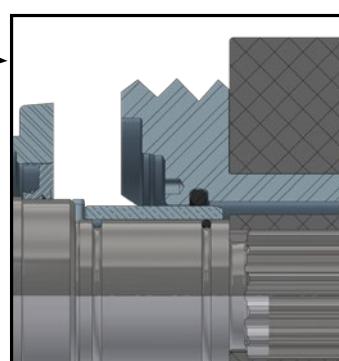

Single Mechanical Seal

Longer life, wider pressure-temperature, and speed range than O-ring seal. Alternate materials available for abrasive service.

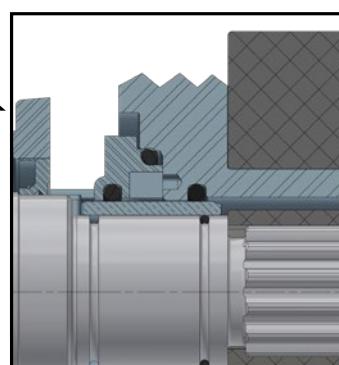

Triple Lip Seal

A chemically inert, low friction FDA seal (PTFE) that offers longer life and reliable performance. *Available upon request.*

"O" Ring Seal*

Waukesha Cherry Burrell's traditional general purpose seal. Low cost and easy to service.

Double "O" Ring Seal*

The double, flushed version of the "O" ring seal. Used with flushing fluid to cool, lubricate, flush away residue.

Elastomer choices for "O" rings:
Buna-N, Fluoroelastomer (FKM)
EPDM, Silicone, Perfluoroelastomer (FFKM), PTFE Encapsulated

*Not available for model 320

† Mechanical seal material options:
Carbon, Ceramic, Silicon Carbide,
Tungsten Carbide

Standard & Options

Body

Ports

Covers

Rotors

O-Rings

Seals

316L SS standard

Optional:

- Flush taps for future double seals
- Body retaining screws

S-Line standard

Optional:

- Bevel Seat, I-Line, Q-Line; European DIN, SMS or RJT
- Male NPT, 150 lb. & 300 lb. Flanges. (150 lb. standard on Model 320)
- Rectangular Flange Inlet or Aseptic ports
- Extended ports
- Optional port sizes on 6, 18, 30 and 60 Models

316L SS plain cover with 3-Wing cover nuts standard

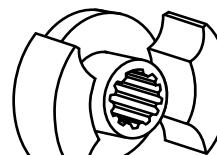

Optional:

- Vent or drain connections
- Aseptic, jacketed or vented
- Hex cover nuts

Alloy 88 Twin Wing standard. Standard clearance for up to 180° F (82° C)

Optional:

- Hot clearance to 300° F (149° C)
- Clearance above 300° F (149° C) on application
- Special & front face clearances and slotted rotor hub for special applications
- Single wing for 30, 60, 130 and 220 models for minimal particulate damage

Twin Wing

Single Wing

Buna-N Standard

Optional: Fluoroelastomer (FKM), EPDM, Silicone, Perfluoroelastomer (FFKM), FEP Encapsulates

Single Buna-N O-Rings with Zirconia sleeve is standard

Optional:

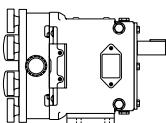

- 316L SS sleeve
- Double O-Ring Seal with Flush Connection
- Single Mechanical Seal with Carbon (One Piece) vs. Ceramic Seal Faces
- Double Mechanical Seal with outer Carbon Seal Face & Flush Connections
- Chrome Oxide, Silicon Carbide, & Tungsten Carbide Seal Faces
- Two piece carbon inner seal

Cast iron powder coated, 316L SS shafts, top shaft

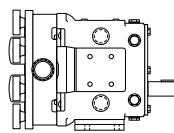

position is Standard.

Options:

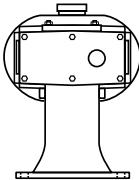

- Stainless Steel gearcase
- Steel-It paint
- 17-4 PH shafts
- Lower shaft position
- Bearing Isolators
- Stainless Steel bearing retainers
- Pedestal shims for side mounted pumps. **Left hand shaft position standard**
- Right hand shaft position on side mounted gearcase

Top Shaft Position Standard

Lower Shaft Position Optional

Optional Side Mount Gear Case for vertical fluid entry

Flat plate, epoxy painted, with adjustable feet, SS coupling guard, and Lovejoy or Woods coupling standard.

Options:

- 304 SS unpolished plate base with adjustable feet
- Portable base with rubber wheels
- SS tubular bases

WCB ISR Integral Speed Reducer Sizes 49, 79 and 239.

Direct connected gear motors.

Mechanical and Electronic Variable Speed Drives.

Hydraulic Motor Drives.

Close coupled Tru-Fit® pump mounted on Epoxy-painted open base.

Features:

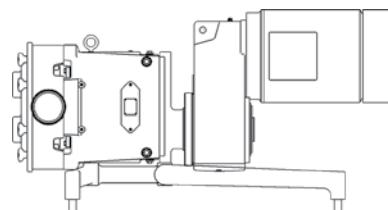

- No shaft alignment necessary. No coupling guard required
- Special base design enhances cleanability
- Reduces overall length of complete unit by an average of 20-25%
- Average of 20-25 gear ratios available per horsepower
- Separate oil sump for gear reducer and timing gears

Options:

- 304 SS unpolished plate base
- 304 SS polished plate base
- NEMA or IEC frames available. Right angle reducer also available for additional space savings
- 1/2 through 60 horsepower drive options available
- Horizontal or vertical porting

Gear Cases

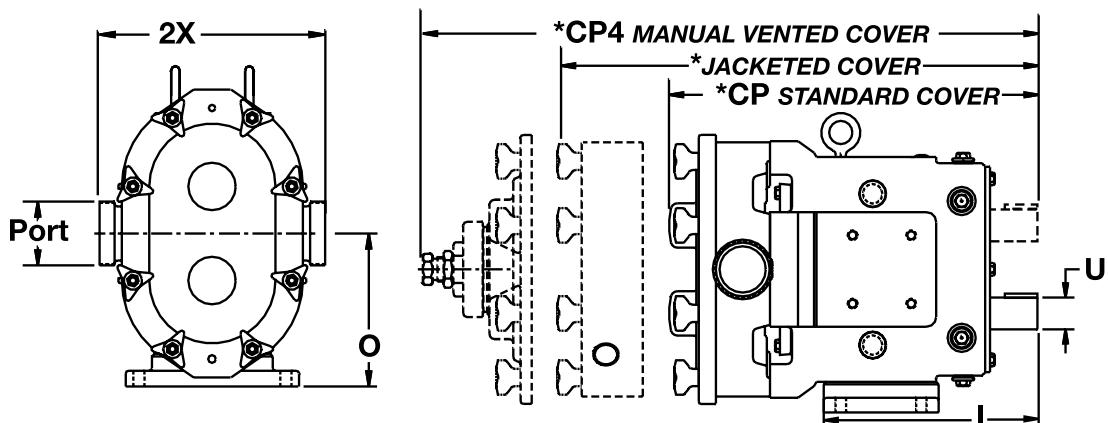

Tru-Fit®

Bases

When it is time to repair ...

SPX FLOW offers the following options – you pick the one that meets your needs.

Factory Remanufacturing Program

- No need to return your pump until you receive your new replacement pump.
- Substantial savings over new pump.
- All remanufactured pumps must pass a 25 point inspection process and undergo performance testing.
- Only OEM genuine parts are used in the remanufacturing process and you receive a guaranteed warranty and quality certificate with each pump.
- New pumps eligible for Remanufacturing Program twice.

Factory Inspect and Advise Program

- Return your pump for extensive factory inspection.
- Cost effective options to match your performance/budget needs.
- Your pump body may be remachined up to 6 times.
- Replacement rotors and parts available.
- Factory warranty.

SPX FLOW Certified Pump Repair Centers

- Local distributors with factory trained and certified service technicians.
- Quick local response.
- Genuine WCB parts.
- Flexible repair programs to meet your needs.
- Local warranty.
